16. Journal checklist: all ten quests **58**

A Strange Coast (w2_mq01) . . . 58
The Signal (w2_mq02) . . . 58
Sleeping Giant (w2_mq03) . . . 58
The Hunter (w2_mq04) . . . 58
Liftoff (w2_mq05) . . . 59
Botanist (w2_sq01) . . . 59
Lost Patrol (w2_sq02) . . . 59
Tideglass Day (w2_sq03) . . . 59
Ancient Echoes (w2_sq04) . . . 60
Stolen Tech (w2_sq05) . . . 60

17. If you are stuck **61**

Stream did not complete A Strange Coast . . . 61
Botanist unavailable or scans did nothing . . . 61
Patrol cache will not recover . . . 61
Cutter shortcut still blocked . . . 61
Temple stone lock does nothing . . . 61
Ring console refuses input . . . 61
Orion awake but missing from party . . . 61
Sleeping Giant still active after recruitment . . . 61
Tideglass Day beach task missing . . . 61
Source Resin craft not credited . . . 62
Crystals inspected earlier but uncredited . . . 62
Confront stalker or Beast absent . . . 62
Beast won but Link absent . . . 62
Transmitter or Stolen Tech blocked . . . 62
Source Gate closed . . . 62
Salvage route/conduits unavailable . . . 62
Bridge reboot or launch does nothing . . . 62
World 3 transition pending . . . 62

18. Playtest checkpoints and reporting **63**

19. Review sources and limits **64**

1. How to use this guide

Start at the World 1 crash transition, or a save at Crash Site with A Strange Coast active. A later debug scenario can already complete tasks and stock equipment; use a campaign save to evaluate ordinary progression and economy.

1. Make a manual starting save and keep it. Use a second slot for rolling progress. Make a separate predeparture save before leaving Sector 9. Do not overwrite your only recovery point with the next chapter.

2. Follow numbered instructions in order. Bold names identify actual rooms and actions. IDs in backticks are for reporting/recovery, not input. Each route arrow is a separate directional tap. Clear entry encounters before using room actions.

3. For conversations, tap the named NPC in the room's NPC row and finish the dialogue. NPC availability changes with story milestones; there is no universal companion-talk control. Main-quest hints may take priority over side-quest offers. Accepting a side quest changes tracking; select the main quest again if desired.

4. Reserve the three quest recipes: damaged cutter + wire + scrap; herb + meat; transmitter core + wire + scrap. Learn each found blueprint before crafting. Keep the repaired Thermal Cutter for shortcuts and preserve the Chime and Bridge until ship installation.

5. Rest and Cook are explicit service buttons below the description; the room-object names in this guide identify their locations. Visible actions can still have event prerequisites. An object description is not a loot promise. The appendix distinguishes containers, dialogue, puzzles and direct rewards. Random battle rewards and arrival levels are not fixed benchmarks.

6. Use normal campaign gear and disable OP/instant victory for combat balance feedback. If you use those controls to check flow, record that separately. Source review and fast victories cannot establish that the Beast is fun or fair.

Check before moving on: You have a starting save, know your rolling slot, and are at Crash Site with the opening quest active.

AP, builds and healing

AP is shared across crew purchases. Review each character's Party skill-tree controls at recruitment and before major fights. Core story/level abilities are separate from paid upgrades. In this world, recruiting Orion and Gh0st awards 2 AP each, Botanist awards 2 AP, and Liftoff awards 4 AP. These are earned awards, not a target for unspent AP: your purchases and earlier save history affect the balance shown. Reset build refunds the selected character's recorded purchases for free outside pending battles; it does not reset other crew builds. Fourth nodes remain locked until World 4 completion.

Orion brings Field Patch when recruited: heal one living ally and add Shield for one turn, with a cooldown of three personal turns. No AP purchase or level-6 unlock is needed for Field Patch. Field Treatment is a separate purchased heal; inspect its actual requirements and description if choosing that path. After Anchor Drill, Nova's Link restores party HP and applies Regen. Keep supplies for emergencies, use rest stops between stretches, and record AP allocation and ability use when evaluating the Beast or later resource pressure.

Optional local NPC rewards and known checks

Charlie, David, Penny and Megan now have explicit ways to end their looping conversations. Use the step-away/leave option and confirm movement returns. Charlie's three trust steps give 25 + 35 + 60 XP and one Comfort Stone total; repeat play/cuddle must not repeat the gift. Penny's first wrestle gives one Pack-Guardian Bandana and 50 XP; later play gives no extra reward.

At Sandy Cove, Kaelen gives one ration and antidote on the first meeting. Revisit for his favor: two Herbs + one Beast Meat buys one Precision Sight, 150 XP and 200 credits. One herb must not pay out or consume a partial bundle. Hazard reminders must not repeat first-meeting supplies. After repairing the patrol cutter, his acknowledgement grants a Battery Pack, three Scrap Metal and 120 XP once. There is no journal quest for these local favors.

At Coastal Resilience Station, Megan asks for one Chemical Catalyst and one Nano Filament. Bring both for her Clinical Bio-Scanner, 200 XP and 250 credits once. Catalyst is in the Resonant Sedge locker; Nano Filament is in the Beached Cargo Wreck crates. Preserve these if doing her favor. Leave her conversation afterward.

These extras are separate from the ten journal quests and from the 650 direct XP awarded by World 2's five side quests. Record their rewards separately. If a recipe or NPC input is unavailable, preserve the save instead of inventing a reward or using instant victory to hide the missing step.

2. Crash Site: Zeke, the Chime and emergency supplies

Main quest: A Strange Coast. The emergency medkit action is inside Escape Pod Interior. Botanist becomes available only after this main quest completes.

7. At **Crash Site**, talk to **Zeke** and finish the crash conversation. Its last line credits Check on Zeke. He already joined during World 1 and must remain in the roster; this must not announce a second recruitment. Read the navigation-pair explanation before inspecting the console.

8. At **Crash Site**, inspect **navigation console**. Recover Chime (`ghost_signal_cell`), Medkit, Ration Pack, Field Rod and Plain Chime Lure. This ordinary campaign kit enables later fishing.

9. From **Crash Site**, go **north** to **Escape Pod Interior** (`sector9_pod_interior`).

10. At **Escape Pod Interior**, use **emergency medkit** to stabilize Zeke. It consumes one ordinary Medkit and credits stabilization. Do this before spending or selling the recovered kit. Inspect **locker** for context; it does not grant another kit. David sells replacements if you spend the last one, but that detour requires funds and travel.

11. At **Escape Pod Interior**, inspect **waterlogged survival console** for optional arcade discovery. Record cabinet status separately; restoration is not required for the World 2 main quest.

12. From **Escape Pod Interior**, go **south** to **Crash Site** (`sector9_crash_site`).

13. At **Crash Site**, read **wreckage** and **glow-water**. Leave scan moss for after Botanist starts; its event requires that active side quest.

14. From **Crash Site**, go **west** to **Overgrown Glade** (`sector9_landing_glade`).

15. At **Overgrown Glade**, harvest **luminous mushrooms** for Herb, then inspect **broadleaf canopy** and **mossy hollow**. Use **Charlie -> Interact** for his optional conversation.

16. From **Overgrown Glade**, go **north** to **Security Perimeter** (`sector9_landing_perimeter`).

17. At **Security Perimeter**, inspect **drone** and **scanner lens**. This is a dead end; return through Overgrown Glade.

18. From **Security Perimeter**, go **south** to **Overgrown Glade** (`sector9_landing_glade`) -> **east** to **Crash Site** (`sector9_crash_site`) -> **east** to **Stream Bank** (`sector9_landing_stream`).

19. At **Stream Bank**, let the entry event complete **A Strange Coast** for **150 event XP**, start **The Signal**, and reveal Tideglass Beach and Razor-Vine Path. Open **river silt cache** for Herbal Poultice and Scrap Metal. Read **glow-water current** and **smooth pebbles**.

20. At **Stream Bank**, talk to the visible **Zeke** for The Signal hint. Do not repeatedly tap expecting Botanist: the gate-location hint has priority while that objective is incomplete. This route accepts Botanist at Stasis after Sleeping Giant, then revisits its scan sites.

21. From **Stream Bank**, go **west** to **Crash Site** (`sector9_crash_site`).

22. At **Crash Site**, note **scan moss** for the later Botanist sweep. Without the active side quest it will not credit a scan; leave it for the return trip.

23. From **Crash Site**, go **east** to **Stream Bank** (`sector9_landing_stream`) -> **south** to **Scorched Brush** (`sector9_landing_brush`).

24. At **Scorched Brush**, harvest **charred starleaf** for Herb and read **muddy clearing**.

25. From **Scorched Brush**, go **east** to **Pod Fragment** (`sector9_landing_drop`).
26. At **Pod Fragment**, inspect **cargo panel**. Note **salvage conduits** for the late Astra repair, but collection needs Liftoff and Astra inspection. Merely finding this room now does not collect them.
27. From **Pod Fragment**, go **west** to **Scorched Brush** (`sector9_landing_brush`) -> **north** to **Stream Bank** (`sector9_landing_stream`).

Check before moving on: MQ01 complete, The Signal active, Zeke stabilized, Botanist deferred, and Chime/rod/lure recovered. If stream completion failed, finish the three opening tasks and re-enter Stream Bank.

3. Stream, submerged vault and first camp

Explore the coast before the temple. Tideglass Day is a later Orion quest; visiting now does not credit its future beach-entry task. Ordinary food pickups can be gathered now.

28. From **Stream Bank**, go **east** to **Mist Pools** (`sector9_stream_pools`).
29. At **Mist Pools**, clear the Siren Skimmer encounter, harvest **reed bulbs**, and read **still basins**. Reeds are at Mist Pools, not Resonant Sedge.
30. From **Mist Pools**, go **south** to **Resonant Sedge** (`sector9_stream_wetlands`).
31. At **Resonant Sedge**, clear Spore-Spitter if encountered, read **spore warning** and **wind-sung reeds**, and open **submerged emergency locker** for Antidote Flask and Pure Iron.
32. From **Resonant Sedge**, go **north** to **Mist Pools** (`sector9_stream_pools`) -> **east** to **Crystalline Flats** (`sector9_stream_flats`).
33. At **Crystalline Flats**, read **half-sunken causeway** and **crystalline sand**, then take the north cave detour.
34. From **Crystalline Flats**, go **north** to **Cavern Entrance** (`sector9_stream_cave_entrance`).
35. At **Cavern Entrance**, read **cave glyphs** and **waterfall curtain**.
36. From **Cavern Entrance**, go **north** to **Glow-Moss Cavern** (`sector9_stream_cave_depths`).
37. At **Glow-Moss Cavern**, clear Echo-Borer, harvest **echo nest** for Beast Meat, read **glowing moss**, and interact with **waterproof cargo case** for VHS discovery. Check its collectible feedback rather than expecting food.
38. From **Glow-Moss Cavern**, go **east** to **Waterlogged Tunnel** (`sector9_stream_sunken_passage`).
39. At **Waterlogged Tunnel**, read **drowned console** and **warm current**. Use **ancient sluice wheel** / **Turn Sluice Wheel** to drain the passage. The south gate checks current room state, not simply whether it was drained once in the past.
40. From **Waterlogged Tunnel**, go **south** to **Submerged Aethel Vault** (`sector9_sunken_aethel_vault`) after the water drains.
41. At **Submerged Aethel Vault**, open **precursor reliquary** for Tidal Resonator Mod, Astral Thread and Bioluminescent Lure. Inspect **living coral**. This equipment detour is optional.
42. From **Submerged Aethel Vault**, go **north** to **Waterlogged Tunnel** (`sector9_stream_sunken_passage`).
43. At **Waterlogged Tunnel**, leave the sluice engaged for revisits. If testing its release, the passage should flood and the south entrance block again; turn it back afterward.
44. From **Waterlogged Tunnel**, go **west** to **Glow-Moss Cavern** (`sector9_stream_cave_depths`) -> **south** to **Cavern Entrance** (`sector9_stream_cave_entrance`) -> **south** to **Crystalline Flats** (`sector9_stream_flats`) -> **east** to **Resonant Falls** (`sector9_stream_falls`).
45. At **Resonant Falls**, choose **Rest** (the recess shelter) to recover and finish its camp sequence. **Sheltered cookfire** provides cooking, **provisions counter** opens the shop, and **penny camp bed** is an optional inspection. Talk to **David** and use **Penny -> Greet** for their camp conversations. Check actual party recovery rather than assuming every campfire heals.

46. At **Resonant Falls**, open the cooking source to discover regional recipes if evaluating cooking. Cook one affordable meal if desired, while preserving quest materials. Eating outside combat and using a meal in combat have different effects; keep observations separate.

47. Save at Resonant Falls. Load once if checking persistence, and confirm party, completed opening quest, containers and fishing gear survive. Return to this same point before continuing.

Check before moving on: Vault and stream rooms explored, first camp visited, supplies recovered, cooking access checked. No required level or credit budget is assumed.

4. Tideglass Beach: fishing and the prism

Botanist weeds are at actual Tide Pools. The prism grants Bioluminescent Focus, not the Focus Conduit from Ancient Echoes. Fishing is optional for main progression.

48. From **Resonant Falls**, go **north** to **Beach Transition** (`sector9_stream_tidepools`).
49. At **Beach Transition**, harvest **tidepool crawler** for Beast Meat and inspect **star crystals**.
50. From **Beach Transition**, go **east** to **Coastal Resilience Station** (`sector9_coastal_research_station`).
51. At **Coastal Resilience Station**, inspect **wetland telemetry array**, **forensic research slate** and **solar coffee press**. Use **Megan -> Consult** and finish her local conversation. This is optional environmental writing.
52. From **Coastal Resilience Station**, go **south** to **Beach Cliffs** (`sector9_beach_cliffs`).
53. At **Beach Cliffs**, read **signal reflection**, **basalt cliffs**, **driftwood marker** and **weathered elephant toy**. The patrol reflection does not replace alpha, beta or gamma.
54. From **Beach Cliffs**, go **north** to **Coastal Resilience Station** (`sector9_coastal_research_station`) -> **north** to **Sandy Cove** (`sector9_beach_cove`).
55. At **Sandy Cove**, read **warm sand** and open **campfire** for cooking if desired. Talk to **Scout Kaelen** and finish his optional beach conversation. Cooking-source access is separate from a named rest event.
56. From **Sandy Cove**, go **west** to **Tide Pools** (`sector9_beach_pools`).
57. At **Tide Pools**, read **pools** and **luminescent anemones**. Note **scan weeds** for Botanist after acceptance; leave **gather tideglass** until Orion gives Tideglass Day. Neither future quest is credited just by visiting now.
58. At **Tide Pools**, use **tide fishing**, set up the Field Rod and Plain Chime Lure as its interface requires, and complete a catch. Follow fight feedback: ease reeling when strain rises, then resume when the fish settles. Confirm catch inventory and journal discovery. The vault lure is an optional upgrade.
59. At **Tide Pools**, return for missing native species if pursuing the whole fishing journal. Follow the displayed journal milestones and claim its actual rewards. Random species are not guaranteed on a particular cast or required for World 2 main-quest completion.
60. From **Tide Pools**, go **west** to **Beached Cargo Wreck** (`sector9_beach_cargo`).
61. At **Beached Cargo Wreck**, open **crates** for Scrap Metal, Composite Plate, Hydraulic Fluid and Nano Filament; read **rusted hull**.
62. From **Beached Cargo Wreck**, go **north** to **Star-Sand Dunes** (`sector9_beach_dunes`).
63. At **Star-Sand Dunes**, harvest **burrowing grazer** for Beast Meat and read **wind-sculpted ridges**.
64. From **Star-Sand Dunes**, go **south** to **Beached Cargo Wreck** (`sector9_beach_cargo`) -> **east** to **Tide Pools** (`sector9_beach_pools`) -> **north** to **Sea Cavern** (`sector9_beach_cave`).
65. At **Sea Cavern**, read **mineral shelter** and open **tide-worn chest** for Bioluminescent Lure, Tideglass Delight and Burn Salve. Receiving that prepared meal does not complete Tideglass Day.
66. From **Sea Cavern**, go **north** to **Sunken Obelisk** (`sector9_beach_pillar`).
67. At **Sunken Obelisk**, read **resonant pillar**.

68. From **Sunken Obelisk**, go **south** to **Sea Cavern** (`sector9_beach_cave`) -> **east** to **Hidden Grotto** (`sector9_beach_grotto`).

69. At **Hidden Grotto**, read **sea-worn arches** and **cache**. The cache explains that Source Resin comes from living materials, not a finished relic on a pedestal.

70. At **Hidden Grotto**, open **bioluminescent prism**. Aim the beam into the receiver, tighten the colored fringe, then balance glow until the receiver is steady green. The current beam presentation does not show numeric target answers; judge visual clue quality first.

71. At **Hidden Grotto**, reference solution: **angle 135 degrees +/-5; lux 64% +/-4; frequency 92 kHz +/-3**. Submit when ready. Success grants **Bioluminescent Focus** (`relic_mod_biolum_focus`); the current event grants neither Focus Conduit nor an extra 150 XP.

72. At **Hidden Grotto**, if you cancel/reopen, local controls reset and you align again. A failed submission should describe beam/fringe/brightness trouble without a reward. After success check one mod award and solved state.

73. From **Hidden Grotto**, go **south** to **Waterlogged Tunnel** (`sector9_stream_sunken_passage`) -> **west** to **Glow-Moss Cavern** (`sector9_stream_cave_depths`) -> **south** to **Cavern Entrance** (`sector9_stream_cave_entrance`) -> **south** to **Crystalline Flats** (`sector9_stream_flats`) -> **west** to **Mist Pools** (`sector9_stream_pools`) -> **west** to **Stream Bank** (`sector9_landing_stream`) -> **west** to **Crash Site** (`sector9_crash_site`).

Check before moving on: Coast sweep complete, future scan sites noted, fishing access checked, prism solved. Tideglass Day waits for Orion. Sanctuary entry later has physical return links; it is not itself permanent departure.

5. Razor-Vine Path and Lost Patrol

Both fern and spore scans are in Resonant Canopy. Reach gamma before recovering the patrol cache. The outer loop avoids locked cutter shortcuts until you repair the tool.

74. From **Crash Site**, go **south** to **Resonant Canopy** (`sector9_canopy`).
75. At **Resonant Canopy**, clear Stalker-Vine. This can credit The Signal canopy-clear task and reveal ridge/temple nodes. Read **ferns**, note **Scan ferns** and **Scan spores** for after Botanist acceptance, and use **Scavenge remains** to start/advance Lost Patrol alpha. An Echo-Borer victory elsewhere is also accepted for The Signal; record whether that alternative is clear.
76. From **Resonant Canopy**, go **south** to **Spore Thickets** (`sector9_wilds_thickets`).
77. At **Spore Thickets**, clear Razor-Vine and use **distress signature alpha** if its journal task remains missing. The same trace also exists at the canopy remains.
78. From **Spore Thickets**, go **east** to **Hound Nest** (`sector9_wilds_nest`).
79. At **Hound Nest**, clear Shard-Hound if encountered, harvest **shard-hound remains**, and open **trampled supply pack** for Beast Meat, Wiring Bundle and Energy Core.
80. From **Hound Nest**, go **west** to **Spore Thickets** (`sector9_wilds_thickets`) -> **south** to **Poison Hollow** (`sector9_wilds_hollow`).
81. At **Poison Hollow**, use **distress signature beta** and inspect **ancient stump**.
82. From **Poison Hollow**, go **south** to **Patrol Graveyard** (`sector9_wilds_grave`).
83. At **Patrol Graveyard**, inspect **transceiver** for context. Its event aliases beta; final cutter recovery is at Burned Glade, not this room.
84. From **Patrol Graveyard**, go **south** to **Canopy Edge** (`sector9_wilds_overlook`).
85. At **Canopy Edge**, read **canopy route** and **canopy vista**.
86. From **Canopy Edge**, go **east** to **Hanging Root Bridge** (`sector9_wilds_canopy_walk`).
87. At **Hanging Root Bridge**, read **razor-vine shortcut**. East needs repaired Thermal Cutter. Use the south outer loop now.
88. From **Hanging Root Bridge**, go **south** to **Architect Gateway** (`sector9_wilds_archway`).
89. At **Architect Gateway**, clear Shard-Hound and read **Aethel boundary stones**.
90. From **Architect Gateway**, go **east** to **Beast Run** (`sector9_wilds_dense_brush`).
91. At **Beast Run**, read **toxic bloom** and open **lost surveyor pack** for Antidote Flask, Medkit Plus and Ration Pack.
92. From **Beast Run**, go **north** to **Burned Glade** (`sector9_wilds_clearance`).
93. At **Burned Glade**, read **shattered trunks**. Note **patrol transceiver**, which needs gamma before recovery. You will return.
94. From **Burned Glade**, go **north** to **Hunter's Blind** (`sector9_wilds_lookout`).

95. At **Hunter's Blind**, use **ridge campsite** for rest and **heat ring cookfire** for cooking. West is still blocked; retrace south through Burned Glade rather than forcing it.

96. From **Hunter's Blind**, go **south** to **Burned Glade** (`sector9_wilds_clearance`) -> **south** to **Beast Run** (`sector9_wilds_dense_brush`) -> **west** to **Architect Gateway** (`sector9_wilds_archway`) -> **north** to **Hanging Root Bridge** (`sector9_wilds_canopy_walk`) -> **north** to **Vine Climb** (`sector9_ridge_climb`).

97. At **Vine Climb**, read **medic satchel**. It gives stabilizer lore, not a promised Medkit drop.

98. From **Vine Climb**, go **north** to **Windy Ledges** (`sector9_ridge_ledges`).

99. At **Windy Ledges**, clear Echo-Borer and harvest **blue-frond cluster** for Herb.

100. From **Windy Ledges**, go **north** to **Beast Lair Approach** (`sector9_ridge_overhang`).

101. At **Beast Lair Approach**, read **weathered mural**.

102. From **Beast Lair Approach**, go **north** to **Canopy Ridge** (`sector9_canopy_ridge`).

103. At **Canopy Ridge**, use **Look at Shield**. This is scouting before Sleeping Giant completes; Confront stalker and the Beast come later. The boss is not an automatic entry encounter.

104. From **Canopy Ridge**, go **east** to **Shield Viewpoint** (`sector9_ridge_viewpoint`).

105. At **Shield Viewpoint**, read **facility sightline**.

106. From **Shield Viewpoint**, go **north** to **Sniper Lookout** (`sector9_ridge_sniper_perch`).

107. At **Sniper Lookout**, use **distress signature gamma**. Verify all three patrol traces before doubling back.

108. From **Sniper Lookout**, go **south** to **Shield Viewpoint** (`sector9_ridge_viewpoint`) -> **west** to **Canopy Ridge** (`sector9_canopy_ridge`) -> **south** to **Beast Lair Approach** (`sector9_ridge_overhang`) -> **south** to **Windy Ledges** (`sector9_ridge_ledges`) -> **south** to **Vine Climb** (`sector9_ridge_climb`) -> **south** to **Hanging Root Bridge** (`sector9_wilds_canopy_walk`) -> **south** to **Architect Gateway** (`sector9_wilds_archway`) -> **east** to **Beast Run** (`sector9_wilds_dense_brush`) -> **north** to **Burned Glade** (`sector9_wilds_clearance`).

109. At **Burned Glade**, use **patrol transceiver**. Receive Damaged Thermal Cutter, its schematic, Wiring Bundle, Scrap Metal and Corrosive Rounds mod. The supplied parts cover the repair; reserve them.

110. At **Burned Glade**, open **Menu -> Tinkering**, learn the found Thermal Cutter schematic (or use the schematic in Items), and craft **Thermal Cutter** from **Damaged Thermal Cutter x1 + Wiring Bundle x1 + Scrap Metal x1**. Confirm Lost Patrol completes for **100 event XP**. Owning an old cutter does not replace its craft task.

111. From **Burned Glade**, go **north** to **Hunter's Blind** (`sector9_wilds_lookout`).

112. At **Hunter's Blind**, rest if needed, then take **west** through the previously blocked vines. Confirm the repaired cutter is retained.

113. From **Hunter's Blind**, go **west** to **Hanging Root Bridge** (`sector9_wilds_canopy_walk`) -> **north** to **Vine Climb** (`sector9_ridge_climb`) -> **north** to **Windy Ledges** (`sector9_ridge_ledges`) -> **north** to **Beast Lair Approach** (`sector9_ridge_overhang`) -> **north** to **Canopy Ridge** (`sector9_canopy_ridge`) -> **east** to **Shield Viewpoint** (`sector9_ridge_viewpoint`) -> **north** to **Sniper Lookout** (`sector9_ridge_sniper_perch`) -> **east** to **High Pass** (`sector9_ridge_crevice`).

114. At **High Pass**, inspect **razor-vine cache** and **fault line** at High Pass. Descriptive cache feedback is not a separate item grant.

115. From **High Pass**, go **east** to **Sanctuary Outlook** (`sector9_ridge_plateau`).

116. At **Sanctuary Outlook**, use **plateau camp** for rest, **stone cookfire** for cooking, and **ridge overlook cache** for VHS discovery.

Check before moving on: Lost Patrol complete and cutter retained; The Signal canopy-clear task done. Botanist is still deferred; all five scan sites will be revisited after acceptance. Ridge scouting is not the Hunter quest completion.

6. Temple Gate and Sanctuary entry

Visit temple wings now for coverage, then return after accepting Ancient Echoes for their actual crystal tasks. First entry uses stone lock and warps directly to Hall of Echoes.

117. From **Sanctuary Outlook**, go **east** to **Stone Courtyard** (`sector9_temple_plaza`).

118. At **Stone Courtyard**, clear Spore-Spitter, then read **processional mural** and **flagstone courtyard**.

119. From **Stone Courtyard**, go **north** to **Outer Guard Post** (`sector9_temple_vestibule`).

120. At **Outer Guard Post**, read **sanitation console**.

121. From **Outer Guard Post**, go **south** to **Stone Courtyard** (`sector9_temple_plaza`) -> **east** to **Resonator Chamber** (`sector9_temple_lock_chamber`).

122. At **Resonator Chamber**, talk to Sentinel-3 / open **Sentinel Scraps** for optional supplies. Check actual prices and retain materials rather than purchasing to meet speculative budget numbers.

123. From **Resonator Chamber**, go **north** to **Left Tuner Column** (`sector9_temple_left_wing`).

124. At **Left Tuner Column**, inspect **western resonance crystal** for context. Ancient Echoes is not yet active, so it cannot credit that quest.

125. From **Left Tuner Column**, go **south** to **Resonator Chamber** (`sector9_temple_lock_chamber`) -> **south** to **Right Tuner Column** (`sector9_temple_right_wing`).

126. At **Right Tuner Column**, inspect **eastern resonance crystal** for context. Note both wing locations for later.

127. From **Right Tuner Column**, go **north** to **Resonator Chamber** (`sector9_temple_lock_chamber`) -> **east** to **Temple Gate** (`sector9_temple_gate`).

128. At **Temple Gate**, try east before authentication: the sealed gate must block travel. Then use **stone lock** after Clear canopy path and Locate Temple Gate are checked. The Signal completes for **200 event XP**, Sleeping Giant starts, and you warp to Hall of Echoes. On revisiting, the opened gate must remain passable after reload.

Check before moving on: MQ02 complete, Sleeping Giant active, current room Hall of Echoes. Keep the Chime for later authentication. Gate opening is not Astra departure.

7. Sleeping Giant: four clues, three decisions, Orion and the Bridge

Waking the pod, talking to Orion and recovering the separate Bridge are three different progression boundaries. Finish them all before his optional errands.

129. At **Hall of Echoes**, inspect **murals** for the memory/pressure/return clue. **Central relief** is the later optional chorus puzzle, not the stasis wake control.

130. From **Hall of Echoes**, go **south** to **Stasis Chamber** (`sector9_stasis_chamber`).

131. At **Stasis Chamber**, inspect **stasis pod** for the pressure-shell clue. Note **root lattice** for Botanist after acceptance. Zeke currently prioritizes the stasis hint; do not expect a side-quest offer or turn-in while that hint is eligible.

132. From **Stasis Chamber**, go **east** to **Ring Array** (`sector9_stasis_ring_array`).

133. At **Ring Array**, leave **ring console** until the remaining overview and coolant clues are read.

134. From **Ring Array**, go **north** to **Observation Deck** (`sector9_stasis_observation`).

135. At **Observation Deck**, read **stasis mural overview**. Note the three sockets and separate memory bands.

136. From **Observation Deck**, go **south** to **Ring Array** (`sector9_stasis_ring_array`) -> **south** to **Coolant Lines** (`sector9_stasis_coolant_lines`).

137. At **Coolant Lines**, use **coolant garden** to stabilize the flow.

138. From **Coolant Lines**, go **north** to **Ring Array** (`sector9_stasis_ring_array`).

139. At **Ring Array**, use **ring console** with all four clues complete. Advance the console explanation to the first choice.

140. At **Ring Array**, choose **Divert pressure around the memory shell.** Pressure goes around Orion, not through his memories.

141. At **Ring Array**, choose **Keep each identity on its own band.** Do not merge the voices into a stronger signal.

142. At **Ring Array**, choose **Reconnect return after the outer bypass settles.** This wakes Orion and credits ring alignment. Wrong choices explain the unsafe route and retry; Step away lets you reopen without completing early.

143. From **Ring Array**, go **west** to **Stasis Chamber** (`sector9_stasis_chamber`).

144. At **Stasis Chamber**, talk to **Orion**, finishing the whole awakening exchange and Nova/Zeke responses. His final invitation recruits him, credits Talk to Orion and reveals **sealed Bridge cradle**.

145. At **Stasis Chamber**, open **sealed Bridge cradle**. Receive **The Bridge** (`bridge_relic`); Sleeping Giant completes for **250 event XP** and The Hunter starts. Check inventory.

146. From **Stasis Chamber**, go **south** to **Source Gate** (`sector9_source_gate`), where **Orion** is now visible. Accept **Tideglass Day** with **Let's go.**, then talk again and accept **Ancient Echoes** with **I can help with that.** Return **north** to **Stasis Chamber** (`sector9_stasis_chamber`), talk to **Zeke**, and accept **Botanist** with **Sure, I'll scan them.** Use **root lattice** to credit the first scan in this route. If Orion's offers are deferred until Liftoff, solve Source Gate and inspect Astra before returning to him; his gate-success line retires after that inspection.

147. Save here. Confirm Orion in the party, Bridge in inventory, Botanist active with roots scanned, and both Orion side quests active. Review Orion's **Field Patch**: a core single-ally heal with a one-turn Shield, a three-personal-turn cooldown and no resurrection. It is available after recruitment without an AP purchase. Inspect affordable crew upgrades and record your allocation before optional sweeps and Beast.

Check before moving on: Orion awake AND recruited; separate Bridge recovered; MQ03 complete; Hunter active; Botanist active with roots scanned; Tideglass Day and Ancient Echoes accepted.

8. Ancient Echoes and the complete Sanctuary sweep

West/east crystals are outside Sanctuary in the Temple tuner wings; north is Acoustics Lab. Sweep foyer, wiring and archives as well as completing the mural.

148. From **Stasis Chamber**, go **north** to **Hall of Echoes** (`sector9_hall_of_echoes`) -> **north** to **Echo Alcoves** (`sector9_hall_echo_alcoves`).

149. At **Echo Alcoves**, read **choir alcove log**.

150. From **Echo Alcoves**, go **north** to **Acoustics Lab** (`sector9_hall_acoustics_lab`).

151. At **Acoustics Lab**, use **northern resonance crystal** with Ancient Echoes active.

152. From **Acoustics Lab**, go **south** to **Echo Alcoves** (`sector9_hall_echo_alcoves`) -> **east** to **Cymatic Basin** (`sector9_hall_reflection_pool`).

153. At **Cymatic Basin**, read **reflection pool** at Cymatic Basin.

154. From **Cymatic Basin**, go **west** to **Echo Alcoves** (`sector9_hall_echo_alcoves`) -> **south** to **Hall of Echoes** (`sector9_hall_of_echoes`) -> **west** to **Sanctuary Grand Hall** (`sector9_foyer_grand_hall`).

155. At **Sanctuary Grand Hall**, read **welcome console**.

156. From **Sanctuary Grand Hall**, go **north** to **Left Reliquary** (`sector9_foyer_left_gallery`).

157. At **Left Reliquary**, clear Ruin-Guardian if encountered and read **botanical research log**.

158. From **Left Reliquary**, go **west** to **Dominion Outpost** (`sector9_foyer_security_hub`).

159. At **Dominion Outpost**, clear its entry encounter if triggered and read **terminal**. This lockdown inspection is not the later vent timing puzzle.

160. From **Dominion Outpost**, go **east** to **Left Reliquary** (`sector9_foyer_left_gallery`) -> **south** to **Sanctuary Grand Hall** (`sector9_foyer_grand_hall`) -> **south** to **Right Archives** (`sector9_foyer_right_gallery`).

161. At **Right Archives**, read **light-mural procession**.

162. From **Right Archives**, go **east** to **Hangar Portal** (`sector9_foyer_vault_door`).

163. At **Hangar Portal**, read **security palimpsest**. Hangar Portal is this room's title, but the actual story hangar route opens at Source Gate later.

164. From **Hangar Portal**, go **east** to **Maintenance Conduit** (`sector9_conduit_crawlspace`).

165. At **Maintenance Conduit**, read **maintenance spores**.

166. From **Maintenance Conduit**, go **east** to **T-Junction Wiring** (`sector9_conduit_junction`).

167. At **T-Junction Wiring**, read **service map**, then visit its south dead end.

168. From **T-Junction Wiring**, go **south** to **Breaker Deck** (`sector9_conduit_breaker_room`).

169. At **Breaker Deck**, read **breakers** and open **technician toolbox** for Rapid Capacitor, Wiring Bundle and Pure Iron. This premade capacitor does not satisfy Stolen Tech's later assembly task.

170. From **Breaker Deck**, go **north** to **T-Junction Wiring** (`sector9_conduit_junction`) -> **north** to **Access Shaft** (`sector9_conduit_access_shaft`).

171. At **Access Shaft**, read **shaft shortcut**. Your repaired Thermal Cutter permits north into the vents; save their quest work for Gh0st's later offer.

172. From **Access Shaft**, go **south** to **T-Junction Wiring** (`sector9_conduit_junction`) -> **west** to **Maintenance Conduit** (`sector9_conduit_crawlspace`) -> **west** to **Hangar Portal** (`sector9_foyer_vault_door`) -> **west** to **Right Archives** (`sector9_foyer_right_gallery`) -> **north** to **Sanctuary Grand Hall** (`sector9_foyer_grand_hall`) -> **west** to **Temple Gate** (`sector9_temple_gate`) -> **west** to **Resonator Chamber** (`sector9_temple_lock_chamber`) -> **north** to **Left Tuner Column** (`sector9_temple_left_wing`).

173. At **Left Tuner Column**, use **western resonance crystal** to credit west.

174. From **Left Tuner Column**, go **south** to **Resonator Chamber** (`sector9_temple_lock_chamber`) -> **south** to **Right Tuner Column** (`sector9_temple_right_wing`).

175. At **Right Tuner Column**, use **eastern resonance crystal**. Verify all three crystal tasks.

176. From **Right Tuner Column**, go **north** to **Resonator Chamber** (`sector9_temple_lock_chamber`) -> **east** to **Temple Gate** (`sector9_temple_gate`) -> **east** to **Sanctuary Grand Hall** (`sector9_foyer_grand_hall`) -> **east** to **Hall of Echoes** (`sector9_hall_of_echoes`).

177. At **Hall of Echoes**, use **central relief** and advance Mural Array's clue: west low support, east answering voice, north high stabilizer.

178. At **Hall of Echoes**, choose **West crystal.** for foundation. Then choose **East in the arcs; north in the star.** Ancient Echoes completes for **Focus Conduit +150 event XP**. Wrong answers permit retry instead of silently restoring the chorus.

179. From **Hall of Echoes**, go **east** to **Archive Vault** (`sector9_archive_vault`).

180. At **Archive Vault**, read **Aethel extinction log**.

181. From **Archive Vault**, go **east** to **Interface Console** (`sector9_archive_reading_room`).

182. At **Interface Console**, read **research terminal**, then use **Caretaker Echo -> Query Archives** for the archive conversation.

183. From **Interface Console**, go **south** to **Tuning Matrix** (`sector9_archive_tuning_bay`).

184. At **Tuning Matrix**, inspect **resonator columns**. This shares the mural event; after central relief completion it should not award a duplicate.

185. From **Tuning Matrix**, go **east** to **Hidden Reliquary** (`sector9_archive_secret_stash`).

186. At **Hidden Reliquary**, use **pedestal** after Ancient Echoes to decode the Bridge calibration record. Open **relic coffer** for Astral Thread, Bioluminescent Focus and Energy Core. This is a separate authored mod source from the coastal prism; two distinct sources are not repeated rewards from one source.

Check before moving on: Ancient Echoes complete; Focus Conduit received; Bridge record decoded; foyer, wiring, archives and chorus rooms visited. Toolbox capacitor is optional loot, not quest assembly.

9. Tideglass Day: return with Orion and craft Source Resin

This quest uses Tinkering, not Cooking. Re-enter actual Tide Pools after accepting it even if you explored the beach earlier.

187. From **Hidden Reliquary**, go **west** to **Tuning Matrix** (`sector9_archive_tuning_bay`) -> **north** to **Interface Console** (`sector9_archive_reading_room`) -> **west** to **Archive Vault** (`sector9_archive_vault`) -> **west** to **Hall of Echoes** (`sector9_hall_of_echoes`) -> **west** to **Sanctuary Grand Hall** (`sector9_foyer_grand_hall`) -> **west** to **Temple Gate** (`sector9_temple_gate`) -> **west** to **Resonator Chamber** (`sector9_temple_lock_chamber`) -> **west** to **Stone Courtyard** (`sector9_temple_plaza`) -> **west** to **Sanctuary Outlook** (`sector9_ridge_plateau`) -> **west** to **High Pass** (`sector9_ridge_crevice`) -> **west** to **Sniper Lookout** (`sector9_ridge_sniper_perch`) -> **south** to **Shield Viewpoint** (`sector9_ridge_viewpoint`) -> **west** to **Canopy Ridge** (`sector9_canopy_ridge`) -> **south** to **Beast Lair Approach** (`sector9_ridge_overhang`) -> **south** to **Windy Ledges** (`sector9_ridge_ledges`) -> **south** to **Vine Climb** (`sector9_ridge_climb`) -> **west** to **Patrol Graveyard** (`sector9_wilds_grave`) -> **north** to **Poison Hollow** (`sector9_wilds_hollow`) -> **north** to **Spore Thickets** (`sector9_wilds_thickets`) -> **north** to **Resonant Canopy** (`sector9_canopy`) -> **north** to **Crash Site** (`sector9_crash_site`) -> **east** to **Stream Bank** (`sector9_landing_stream`) -> **east** to **Mist Pools** (`sector9_stream_pools`) -> **east** to **Crystalline Flats** (`sector9_stream_flats`) -> **east** to **Resonant Falls** (`sector9_stream_falls`) -> **north** to **Beach Transition** (`sector9_stream_tidepools`) -> **north** to **Tide Pools** (`sector9_beach_pools`). Stop at **Resonant Canopy** for **Scan ferns** AND **Scan spores**, and at **Crash Site** for **scan moss**, now that Botanist is active. These actions do not require another battle.

188. At **Tide Pools**, let entry credit **Visit Tide Pools**, then use **gather tideglass**. Receive **Herb x1 + Beast Meat x1 + Source Resin schematic**. It supplies exact crafting ingredients even if earlier food was used. Also use **scan weeds** for Botanist. Together with roots, ferns, spores and moss, this is the fifth scan; the quest must stay active until you report to Zeke.

189. At **Tide Pools**, open **Menu -> Tinkering**, learn Source Resin through Found schematics or use its blueprint in Items. Select **Source Resin Mod** and craft from **Herb x1 + Beast Meat x1** while the quest is active and Collect food done.

190. At **Tide Pools**, confirm Source Resin in inventory and quest completion for **150 event XP + Neural Stabilizer x2**. Cooking Tideglass Delight, opening the grotto cache or possessing old resin does not satisfy the craft task.

191. From **Tide Pools**, go **south** to **Beach Transition** (`sector9_stream_tidepools`) -> **south** to **Resonant Falls** (`sector9_stream_falls`).

192. At **Resonant Falls**, choose **Rest** (recess shelter), restock from **provisions counter** if needed, and save before the ridge boss. Record actual gear/levels rather than meeting the old guide's unverified budget.

Check before moving on: Tideglass Day complete; Source Resin crafted; recovery save before Beast. Stolen Tech waits for the Hunter drill.

10. The Hunter: Gh0st, Beast and Anchor Drill

Return to the ridge with Orion and Bridge. Beast victory recruits Gh0st; drill completion unlocks Link and finishes the Hunter. These rewards happen at different times.

193. From **Resonant Falls**, go **west** to **Crystalline Flats** (`sector9_stream_flats`) -> **west** to **Mist Pools** (`sector9_stream_pools`) -> **west** to **Stream Bank** (`sector9_landing_stream`) -> **west** to **Crash Site** (`sector9_crash_site`) -> **south** to **Resonant Canopy** (`sector9_canopy`) -> **south** to **Spore Thickets** (`sector9_wilds_thickets`) -> **south** to **Poison Hollow** (`sector9_wilds_hollow`) -> **south** to **Patrol Graveyard** (`sector9_wilds_grave`) -> **east** to **Vine Climb** (`sector9_ridge_climb`) -> **north** to **Windy Ledges** (`sector9_ridge_ledges`) -> **north** to **Beast Lair Approach** (`sector9_ridge_overhang`) -> **north** to **Canopy Ridge** (`sector9_canopy_ridge`).

194. At **Canopy Ridge**, use **Confront stalker** and finish Gh0st's dialogue. This records confrontation and reveals **Face the Beast**. Earlier scouting did not do this.

195. At **Canopy Ridge**, heal, check equipped gear/abilities and record AP purchases, then use **Face the Beast**. During combat, use Orion's **Field Patch** to support a living ally as needed; healing consumes an action and its cooldown still matters. For balance evaluation fight with normal campaign gear and OP disabled. Record battle time, damage, healing pressure, telegraph readability and any party deaths.

196. At **Canopy Ridge**, if defeated or retreating, return and use **Face the Beast** again. The fight repeats until victory; defeat/retreat should not mark the boss defeated or grant Hunter completion XP.

197. At **Canopy Ridge**, after victory confirm **Gh0st joins**, **Anchor Drill** appears and the Hunter remains active. Do not leave thinking Link already unlocked.

198. At **Canopy Ridge**, use **Anchor Drill** and finish its cinematic. Confirm **Nova Link**, Hunter completion for **300 event XP**, and Liftoff starts. Link restores party HP and applies Regen; it does not share damage. A saved pending scene should resume with one completion payout.

199. At **Canopy Ridge**, talk to **Gh0st** until he offers **Stolen Tech**; accept **I'll fetch it.** Its offer requires Hunter complete, so a conversation immediately after Beast but before the drill is too early.

200. Save before leaving. Check Nova, Zeke, Orion and Gh0st in party; Link unlocked; Liftoff and Stolen Tech active. Record discrepancies now.

Check before moving on: Hunter complete, not just Beast defeated; Link available; Stolen Tech accepted. Finish its quest before departure.

11. Stolen Tech: mask, hatch and capacitor

There is no real-time countdown. A correct mask latches until you cross. Follow the sequence even if you looted a premade capacitor.

201. From **Canopy Ridge**, go **east** to **Shield Viewpoint** (`sector9_ridge_viewpoint`) -> **north** to **Sniper Lookout** (`sector9_ridge_sniper_perch`) -> **east** to **High Pass** (`sector9_ridge_crevice`) -> **east** to **Sanctuary Outlook** (`sector9_ridge_plateau`) -> **east** to **Stone Courtyard** (`sector9_temple_plaza`) -> **east** to **Resonator Chamber** (`sector9_temple_lock_chamber`) -> **east** to **Temple Gate** (`sector9_temple_gate`) -> **east** to **Sanctuary Grand Hall** (`sector9_foyer_grand_hall`) -> **east** to **Hall of Echoes** (`sector9_hall_of_echoes`) -> **south** to **Stasis Chamber** (`sector9_stasis_chamber`). At Stasis, talk to **Zeke** to finish Botanist\'s **Return to Zeke** task. Record **100 XP + Neural Stabilizer x2 + one 2-AP award**. Talk again/reload: no repeat payout. Five scans alone must not complete the quest.

202. At **Stasis Chamber**, inspect **ceiling vent** for context. It describes the route toward High Gantry and Infiltration Hatch; it does not recover the transmitter. Continue to the actual case at Transmitter Site after the bypass sequence.

203. From **Stasis Chamber**, go **east** to **Ring Array** (`sector9_stasis_ring_array`) -> **north** to **Observation Deck** (`sector9_stasis_observation`) -> **north** to **Infiltration Hatch** (`sector9_vents_access_grate`) -> **west** to **High Gantry** (`sector9_vents_gantry`).

204. At **High Gantry**, use **security grid**. Read two narrow scan pulses followed by a long maintenance gap. Choose **Latch the mask to the long maintenance gap.** Wrong narrow-pulse input retries without inventing a timer.

205. From **High Gantry**, go **east** to **Infiltration Hatch** (`sector9_vents_access_grate`).

206. At **Infiltration Hatch**, use **guard-system bypass** after the grid task is done. Confirm guards bypassed. Observation Deck also connects here, but the mask is set at High Gantry.

207. From **Infiltration Hatch**, go **north** to **Transmitter Site** (`sector9_vents_tech_alcove`).

208. At **Transmitter Site**, use **case** for **Dominion Transmitter Core + Rapid Capacitor schematic + Wiring Bundle + Scrap Metal**. The Stasis ceiling vent is descriptive only. Recover the core here after completing the grid and guard bypass; the guarded sequence prevents duplicate recovery.

209. At **Transmitter Site**, open **Menu -> Tinkering**, learn Rapid Capacitor schematic, select **Rapid Capacitor Mod**, and craft **Dominion Transmitter Core x1 + Scrap Metal x1 + Wiring Bundle x1**.

210. At **Transmitter Site**, verify Stolen Tech completes for **150 event XP**. A toolbox capacitor may give another copy; only successful assembly after core recovery fulfills this quest. **Known item-copy issue:** Rapid Capacitor currently grants **Speed +5 and Agility +3**; do not assume it shortens skill cooldowns despite that description.

Check before moving on: All five side quests complete: Botanist, Lost Patrol, Tideglass Day, Ancient Echoes and Stolen Tech. Use journal/recovery reference before launch if anything remains active.

12. Source Gate: prepare four feeds and resolve the lock

Liftoff requires horn, cup, pressure gauge and breakers, then two actual routing decisions. Visit these while Liftoff is active; prior room coverage alone is insufficient.

211. From **Transmitter Site**, go **south** to **Infiltration Hatch** (`sector9_vents_access_grate`) -> **south** to **Observation Deck** (`sector9_stasis_observation`) -> **south** to **Ring Array** (`sector9_stasis_ring_array`) -> **west** to **Stasis Chamber** (`sector9_stasis_chamber`) -> **south** to **Source Gate** (`sector9_source_gate`).

212. At **Source Gate**, try east before resolving the lock: the barrier must block the hangar. Read its explanation. **Acoustic lock** waits for all four feed milestones. After resolution, the forward route stays open, including after reload.

213. From **Source Gate**, go **west** to **Harmonic Horn** (`sector9_gate_emitter_left`).

214. At **Harmonic Horn**, use **emitter memory** to stabilize Harmonic Horn.

215. From **Harmonic Horn**, go **east** to **Source Gate** (`sector9_source_gate`) -> **south** to **Resonance Cup** (`sector9_gate_emitter_right`).

216. At **Resonance Cup**, use **emitter service log** to ground Resonance Cup.

217. From **Resonance Cup**, go **north** to **Source Gate** (`sector9_source_gate`) -> **north** to **Stasis Chamber** (`sector9_stasis_chamber`) -> **east** to **Ring Array** (`sector9_stasis_ring_array`) -> **south** to **Coolant Lines** (`sector9_stasis_coolant_lines`) -> **east** to **Source Dynamo** (`sector9_power_turbine`).

218. At **Source Dynamo**, read **turbine inscription** and **dynamo housing** at Source Dynamo. The route goes back through stasis, Ring Array and Coolant Lines, then east.

219. From **Source Dynamo**, go **east** to **Distribution Manifold** (`sector9_power_manifold`).

220. At **Distribution Manifold**, choose **Rest** (facility camp station) to recover and **manifold cooker** for its cooking discovery if desired. This is a facility recovery stop.

221. From **Distribution Manifold**, go **south** to **Generator Controls** (`sector9_power_breaker_deck`).

222. At **Generator Controls**, use **generator breakers** and read **bus bar array**.

223. From **Generator Controls**, go **east** to **Purge Valve** (`sector9_power_valve`).

224. At **Purge Valve**, read **root pressure gauge**: **BLEED, STARVE, RESOLVE**. Roots relieve into grounded receiver, lock loses power, Orion resolves the remaining chord.

225. From **Purge Valve**, go **west** to **Generator Controls** (`sector9_power_breaker_deck`) -> **north** to **Distribution Manifold** (`sector9_power_manifold`) -> **west** to **Source Dynamo** (`sector9_power_turbine`) -> **west** to **Coolant Lines** (`sector9_stasis_coolant_lines`) -> **north** to **Ring Array** (`sector9_stasis_ring_array`) -> **west** to **Stasis Chamber** (`sector9_stasis_chamber`) -> **south** to **Source Gate** (`sector9_source_gate`).

226. At **Source Gate**, use **acoustic lock** with all feeds complete. Advance to the routing questions.

227. At **Source Gate**, choose **Open the root relief into the grounded receiver.** Then **Isolate the lock supply; keep the relief path open.** This credits gate bypass and warps to Hangar Bay. Wrong answers explain the issue; Step away allows reopening without premature success.

Check before moving on: Gate bypass credited; Hangar Bay current. This is not departure: Astra still needs inspection, conduits, Bridge installation and confirmation.

13. Astra repair, hangar and grounded sky previews

Inspect the ship first to unlock its salvage shortcut. Launch happens in Hangar Bay. Sky rooms are grounded flight-plan projections, not another flight dungeon.

228. At **Hangar Bay**, use **dark console** to inspect Astra. Read the failed-power explanation; **salvage return route** appears.

229. At **Hangar Bay**, use **salvage return route** to travel directly to **Pod Fragment**. It requires Liftoff and Astra inspection.

230. At **Pod Fragment**, use **salvage conduits** now. Confirm Collect power conduits checked; this stores quest progress rather than an ordinary stackable conduit inventory item.

231. At **Pod Fragment**, use **return to Astra** to go directly to Hangar Bay.

232. At **Hangar Bay**, use **bridge relic** with conduits recovered, the Bridge and Chime present. Installation consumes the Bridge; authentication checks and retains the Chime. Confirm Reboot Bridge relic done.

233. From **Hangar Bay**, go **south** to **Freight Lift** (`sector9_hangar_staging`).

234. At **Freight Lift**, inspect **cargo restraints** at Freight Lift. The departure warning is not a second launch control.

235. From **Freight Lift**, go **north** to **Hangar Bay** (`sector9_hangar_bay`) -> **north** to **Maintenance Catwalks** (`sector9_hangar_scaffolding`).

236. At **Maintenance Catwalks**, inspect **hangar overlook**.

237. From **Maintenance Catwalks**, go **east** to **Control Console** (`sector9_hangar_tower`).

238. At **Control Console**, inspect **airlane chart**. Flight stays low toward the Spire beneath the Shield.

239. From **Control Console**, go **south** to **Fuel Intake Lines** (`sector9_hangar_fuel_lines`).

240. At **Fuel Intake Lines**, inspect **conduit bus**.

241. From **Fuel Intake Lines**, go **north** to **Control Console** (`sector9_hangar_tower`) -> **north** to **Launch Blast Shield** (`sector9_hangar_lock`).

242. At **Launch Blast Shield**, inspect **launch safety panel**, which directs you to Hangar Bay for departure. Take north for optional previews.

243. From **Launch Blast Shield**, go **north** to **The Sky** (`sector9_the_sky`).

244. At **The Sky**, read **airlane preview**. You are still grounded; this is not departure.

245. From **The Sky**, go **north** to **Mesosphere Storm** (`sector9_sky_mesosphere`).

246. At **Mesosphere Storm**, read **storm overlay**.

247. From **Mesosphere Storm**, go **north** to **Shield Threshold** (`sector9_sky_shield_threshold`).

248. At **Shield Threshold**, read **shield ceiling overlay**.

249. From **Shield Threshold**, go **east** to **Security Buoy** (`sector9_sky_sensor_buoy`).

250. At **Security Buoy**, read **security scan preview**.

251. From **Security Buoy**, go **west** to **Shield Threshold** (`sector9_sky_shield_threshold`) -> **north** to **Barrier Controller** (`sector9_sky_barrier_core`).

252. At **Barrier Controller**, read **guidance interference model**.

253. From **Barrier Controller**, go **south** to **Shield Threshold** (`sector9_sky_shield_threshold`) -> **west** to **Pushback Node** (`sector9_sky_hard_deck`).

254. At **Pushback Node**, read **altitude limiter**.

255. From **Pushback Node**, go **east** to **Shield Threshold** (`sector9_sky_shield_threshold`) -> **south** to **Mesosphere Storm** (`sector9_sky_mesosphere`) -> **south** to **The Sky** (`sector9_the_sky`) -> **south** to **Launch Blast Shield** (`sector9_hangar_lock`) -> **south** to **Control Console** (`sector9_hangar_tower`) -> **west** to **Maintenance Catwalks** (`sector9_hangar_scaffolding`) -> **south** to **Hangar Bay** (`sector9_hangar_bay`).

Check before moving on: Bridge installed, Chime retained, ship repaired, all hangar/preview rooms visited. Do not search preview rooms for another launch puzzle.

14. Final audit and departure

Finish local errands before confirming departure. The current repository does not justify calling all incomplete quests permanently failed; this transition nevertheless takes you away from Sector 9.

256. Open journal: MQ01-04 complete; Liftoff active with gate, inspection, conduits and reboot checked. All five side quests complete. Section 16 lists every current task.

257. Check optional sweep: prism; drained vault; river/wetland/hound/surveyor/beach/cavern/breaker/reliquary containers; both VHS interactions; pod arcade discovery; Bridge record; fishing and cooking access; every room in Section 15. Random journal completion and cabinet restoration are separate system goals.

258. Make a separate predeparture save and keep it during World 3 testing. Record actual party level, credits, XP, equipment and consumables for comparing runs; no invented arrival targets are required.

259. At **Hangar Bay**, use **launch cradle** and choose **Finish exploring Sector 9.** once if testing cancellation. Ship should stay grounded, Liftoff active and repairs intact.

260. At **Hangar Bay**, when ready use **launch cradle** again and choose **Release the cradle and depart.** Finish the cinematic. Astra follows the low service airlane beneath the Shield; local interference brings the crew down near the Spire.

261. Verify arrival at `spire_sewers_landing`, Liftoff completion for **350 event XP**, and World 3 quest `w3_mq11` active. These effects occur after the cinematic finishes, once. Keep your Sector 9 save.

Check before moving on: All ten World 2 quests completed through the intended route. Record actual presentation/balance issues separately from authored progression expectations.

15. All-room reference

Generated from current runtime catalogs. Base prose is shown; milestone/state variants can change it during play. NPC placement rules and physical locks are explicit below. Event prerequisites still apply to visible actions. Rest and Cook are service buttons rather than bold actionable bed/cooker words.

Crash Site (`sector9_landing`)

Entry: **Crash Site** (`sector9_crash_site`). Entry policy: hub; return policy: entry.

Crash Site (`sector9_crash_site`)

The escape pod wreckage sits half-submerged in warm glow-water. A scorched navigation console ticks under an open panel. Zeke coughs on the hull while scan moss vibrates along the seams.

- **Exits: north** -> Escape Pod Interior (`sector9_pod_interior`); **south** -> Resonant Canopy (`sector9_canopy`); **west** -> Overgrown Glade (`sector9_landing_glade`); **east** -> Stream Bank (`sector9_landing_stream`).
- **NPC:** Zeke (`zeke`); requires milestones ms_w1_mq05_complete; absent after ms_w2_mq01_complete. While visible, quest dialogue eligibility still applies.
- **Direct encounters:** none; action-spawned encounters are separate.
- **wreckage** (generic; object: wreckage): The pod's thrusters are completely fused. It won't fly again.
- **navigation console** (generic; object: navigation console): Objective completed.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_pod_examined"}`.
- Event `w2_mq01_examine_pod` prerequisites: `[{"type": "quest_active", "quest_id": "w2_mq01"}, {"type": "quest_task_done", "quest_id": "w2_mq01", "task_id": "check_on_zeke"}, {"type": "quest_task_not_done", "quest_id": "w2_mq01", "task_id": "examine_pod"}]`. See the numbered route for its quest/reward sequence.
- **glow-water** (generic; object: glow-water): The water is warm and vibrates with a gentle frequency. It feels soothing to touch.
- **scan moss** (generic; object: scan moss): Objective completed.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_flora_moss_scanned"}`.
- Event `w2_sq01_scan_moss` prerequisites: `[{"type": "quest_active", "quest_id": "w2_sq01"}, {"type": "quest_task_not_done", "quest_id": "w2_sq01", "task_id": "scan_flora_3"}]`. See the numbered route for its quest/reward sequence.

Escape Pod Interior (`sector9_pod_interior`)

The cramped interior of the escape pod is scorched and smells of melted plastic. Sparks shower from the waterlogged survival console, and a dented emergency storage locker hangs open beside an emergency medkit.

- **Exits: south** -> Crash Site (`sector9_crash_site`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **locker** (generic; object: locker): A basic emergency kit contains field dressings and mineral water.
- **emergency medkit** (generic; object: emergency medkit): Objective completed.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_zeke_stabilized"}`.

- Event `w2_mq01_stabilize_zeke` prerequisites: `[{"type": "quest_active", "quest_id": "w2_mq01"}, {"type": "quest_task_done", "quest_id": "w2_mq01", "task_id": "examine_pod"}, {"type": "item", "item_id": "medkit"}, {"type": "quest_task_not_done", "quest_id": "w2_mq01", "task_id": "stabilize_zeke"}]`. See the numbered route for its quest/reward sequence.
- **waterlogged survival console** (arcade_discovery; object: waterlogged survival console): An emerald optic board glimmers in the waterproof survival pod console.
- Action visibility/requirements: `{"hide_when_milestone": "ms_arcade_cabinet_02_repaired"}`.

Scorched Brush (`sector9_landing_brush`)

Shattered vines and charred branches litter the muddy clearing where the pod plowed through. A patch of charred starleaf is still warm to the touch, venting thin plumes of gray steam.

- **Exits: north** -> Stream Bank (`sector9_landing_stream`); **east** -> Pod Fragment (`sector9_landing_drop`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **charred starleaf** (generic; object: charred starleaf): Already harvested.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_herb_landing_foraged"}`.
- Event `w2_forage_herb_landing` prerequisites: `[{"type": "milestone_not_set", "milestone": "ms_w2_herb_landing_foraged"}]`. See the numbered route for its quest/reward sequence.
- **muddy clearing** (generic; object: muddy clearing): Torn soil and crushed ferns mark the escape pod's violent deceleration trench.

Overgrown Glade (`sector9_landing_glade`)

A dense grove of giant ferns forms a broadleaf canopy overhead, filtering the dim sky into a green haze. Luminous mushrooms grow in thick clumps along a decaying log beside a small mossy hollow.

- **Exits: east** -> Crash Site (`sector9_crash_site`); **north** -> Security Perimeter (`sector9_landing_perimeter`).
- **NPC:** Charlie (`creature_charlie`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **luminous mushrooms** (generic; object: luminous mushrooms): Already harvested.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_herb_glade_foraged"}`.
- Event `w2_forage_herb_glade` prerequisites: `[{"type": "milestone_not_set", "milestone": "ms_w2_herb_glade_foraged"}]`. See the numbered route for its quest/reward sequence.
- **broadleaf canopy** (generic; object: broadleaf canopy): Giant fronds filter the alien sunlight into a dappled teal glow, humming with ambient spore drift.
- **mossy hollow** (inspect; object: mossy hollow): A soft burrow lined with damp fern moss. Several dozen velvety, rounded spore puff balls are neatly clustered inside, clearly saved for playtime.

Stream Bank (`sector9_landing_stream`)

A clear stream of warm water flows east toward the coast, its glow-water current rippling softly. Smooth pebbles line the banks under hanging ferns, where a half-submerged river silt cache is lodged among the roots.

- **Exits: west** -> Crash Site (`sector9_crash_site`); **east** -> Mist Pools (`sector9_stream_pools`); **south** -> Scorched Brush (`sector9_landing_brush`).

- **NPC:** Zeke (`zeke`); requires milestones ms_w2_mq01_complete; absent after ms_w2_mq02_complete. While visible, quest dialogue eligibility still applies.
- **Direct encounters:** none; action-spawned encounters are separate.
- **glow-water current** (generic; object: glow-water current): The current carries warm notes through the roots, like the Ocean breathing under the swamp.
- **smooth pebbles** (generic; object: smooth pebbles): Water-rounded quartz crystals and silt shards coat the riverbank, warm to the touch.
- **river silt cache** (container; object: river silt cache): Open once for Herbal Poultice, Scrap Metal. Persisted state: `w2_landing_stream_cache_opened`.

Security Perimeter (`sector9_landing_perimeter`)

A smashed Dominion surveillance drone lies wedged between two stone blocks. Its primary scanner lens is shattered, but a small backup light still flashes a slow warning code.

- **Exits: south** -> Overgrown Glade (`sector9_landing_glade`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **drone** (generic; object: drone): The chassis is crushed, but its recording cells hum faintly.
- **scanner lens** (generic; object: scanner lens): The fractured optics still flicker with faint infrared sweeps, tracking heat signatures across the brush.

Pod Fragment (`sector9_landing_drop`)

A metal cargo panel from the escape pod has sheared off and sits wedged in the mud. Underneath it, salvage conduits, empty battery cells, and diagnostic wires lie scattered.

- **Exits: west** -> Scorched Brush (`sector9_landing_brush`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **salvage conduits** (generic; object: salvage conduits): Salvaging power conduits from the pod wreckage...
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_conduits_collected"}`.
- Event `w2_mq05_collect_conduits` prerequisites: `[{"type": "quest_active", "quest_id": "w2_mq05"}, {"type": "quest_task_done", "quest_id": "w2_mq05", "task_id": "inspect_astra"}, {"type": "quest_task_not_done", "quest_id": "w2_mq05", "task_id": "collect_power_conduits"}]`. See the numbered route for its quest/reward sequence.
- **cargo panel** (generic; object: cargo panel): Reinforced alloy stenciled with Dominion emergency release instructions. The hydraulic latch is crushed shut.
- **return to Astra** (generic; object: return to Astra): Follow the opened service route back to the Astra.
- Action visibility/requirements: `{"show_when_milestone": "ms_w2_conduits_collected", "requires_milestone_not_set": "ms_w2_mq05_complete"}`.
- Event `w2_mq05_return_to_hangar` prerequisites: `[{"type": "quest_active", "quest_id": "w2_mq05"}, {"type": "quest_task_done", "quest_id": "w2_mq05", "task_id": "collect_power_conduits"}]`. See the numbered route for its quest/reward sequence.

Razor-Vine Path (`razor_vine_path`)

Entry: **Resonant Canopy** (`sector9_canopy`). Entry policy: transition; return policy: entry.

Resonant Canopy (`sector9_canopy`)

The canopy of the ruins is covered in giant, crystalline ferns that catch the dim light and buzz with low-frequency standing waves. You can scan the ferns or scan the drifting spores for harmonic readings, or scavenge the remains of a fallen scout tangled nearby.

- **Exits: north** -> Crash Site (`sector9_crash_site`); **south** -> Spore Thickets (`sector9_wilds_thickets`).
- **Direct encounters:** stalker_vine.
- **ferns** (generic; object: ferns): Their leaves vibrate like harp strings when touched, ringing out a quiet chord.
- **Scan ferns** (generic; object: Scan ferns): Objective completed.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_flora_ferns_scanned"}`.
- Event `w2_sq01_scan_ferns` prerequisites: `[{"type": "quest_active", "quest_id": "w2_sq01"}, {"type": "quest_task_not_done", "quest_id": "w2_sq01", "task_id": "scan_flora_1"}]`. See the numbered route for its quest/reward sequence.
- **Scan spores** (generic; object: Scan spores): The razor-vine spores vibrate with high energy.
- Event `w2_sq01_scan_spores` prerequisites: `[{"type": "quest_active", "quest_id": "w2_sq01"}, {"type": "quest_task_not_done", "quest_id": "w2_sq01", "task_id": "scan_flora_4"}]`. See the numbered route for its quest/reward sequence.
- **Scavenge remains** (generic; object: Scavenge remains): A fallen Dominion scout lies tangled in the vines.
- Event `w2_sq02_start_trace_alpha` prerequisites: `[{"type": "quest_not_started", "quest_id": "w2_sq02"}]`. See the numbered route for its quest/reward sequence.
- Event `w2_sq02_trace_alpha` prerequisites: `[{"type": "quest_active", "quest_id": "w2_sq02"}, {"type": "quest_task_not_done", "quest_id": "w2_sq02", "task_id": "trace_alpha"}]`. See the numbered route for its quest/reward sequence.

Spore Thickets (`sector9_wilds_thickets`)

A dense tangle of glowing vines and thorned thickets. The air is thick with purple spores, and distress signature alpha repeats under the static hiss.

- **Exits: north** -> Resonant Canopy (`sector9_canopy`); **east** -> Hound Nest (`sector9_wilds_nest`); **south** -> Poison Hollow (`sector9_wilds_hollow`).
- **Direct encounters:** razor_vine.
- **distress signature alpha** (generic; object: distress signature alpha): Objective completed.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_beacon_alpha_traced"}`.
- Event `w2_sq02_start_trace_alpha` prerequisites: `[{"type": "quest_not_started", "quest_id": "w2_sq02"}]`. See the numbered route for its quest/reward sequence.
- Event `w2_sq02_trace_alpha` prerequisites: `[{"type": "quest_active", "quest_id": "w2_sq02"}, {"type": "quest_task_not_done", "quest_id": "w2_sq02", "task_id": "trace_alpha"}]`. See the numbered route for its quest/reward sequence.

Hound Nest (`sector9_wilds_nest`)

A shallow den trampled into the briars. Shard-hound tracks crisscross the mud around shard-hound remains and a trampled supply pack dragged beneath the thorns.

- **Exits: west** -> Spore Thickets (`sector9_wilds_thickets`).
- **Direct encounters:** shard_hound.
- **shard-hound remains** (generic; object: shard-hound remains): Already harvested.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_meat_nest_foraged"}`.
- Event `w2_forage_meat_nest` prerequisites: `[{"type": "milestone_not_set", "milestone": "ms_w2_meat_nest_foraged"}]`. See the numbered route for its quest/reward sequence.
- **trampled supply pack** (container; object: trampled supply pack): Open once for Beast Meat, Wiring Bundle, Energy Core. Persisted state: `w2_hound_nest_pack_opened`.

Poison Hollow (`sector9_wilds_hollow`)

A low-lying hollow filled with a thick, stagnant layer of toxic purple spores around an ancient stump. Distress signature beta blinks inside a root cage, and every breath drains guard rapidly.

- **Exits: north** -> Spore Thickets (`sector9_wilds_thickets`); **south** -> Patrol Graveyard (`sector9_wilds_grave`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **distress signature beta** (generic; object: distress signature beta): Objective completed.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_beacon_beta_traced"}`.
- Event `w2_sq02_trace_beta` prerequisites: `[{"type": "quest_active", "quest_id": "w2_sq02"}, {"type": "quest_task_not_done", "quest_id": "w2_sq02", "task_id": "trace_beta"}]`. See the numbered route for its quest/reward sequence.
- **ancient stump** (generic; object: ancient stump): A hollowed tree trunk large enough to shelter an expedition team from sudden squalls.

Patrol Graveyard (`sector9_wilds_grave`)

The rusted remains of a Dominion scouting squad lie scattered among the vines. Their suits are cracked, and one body holds a transceiver beside a damaged Thermal Cutter.

- **Exits: north** -> Poison Hollow (`sector9_wilds_hollow`); **east** -> Vine Climb (`sector9_ridge_climb`); **south** -> Canopy Edge (`sector9_wilds_overlook`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **transceiver** (generic; object: transceiver): A fallen soldier holds an encrypted datapad, repair notes, and a damaged Thermal Cutter.
- Event `w2_sq02_trace_beta` prerequisites: `[{"type": "quest_active", "quest_id": "w2_sq02"}, {"type": "quest_task_not_done", "quest_id": "w2_sq02", "task_id": "trace_beta"}]`. See the numbered route for its quest/reward sequence.

Canopy Edge (`sector9_wilds_overlook`)

A sheer ledge opens onto a canopy vista of Sector 9's endless green. Luminous waterways trace a canopy route below, while the Planetary Shield grid waves curve across the sky.

- **Exits: north** -> Patrol Graveyard (`sector9_wilds_grave`); **east** -> Hanging Root Bridge (`sector9_wilds_canopy_walk`).
- **Direct encounters:** none; action-spawned encounters are separate.

- **canopy route** (generic; object: canopy route): From here the luminous waterways reveal a continuous route from crash site to temple ruins.
- **canopy vista** (generic; object: canopy vista): From this high vantage, the vast swamp stretches to the coastal horizon under a double ring of starlight.

Hanging Root Bridge (`sector9_wilds_canopy_walk`)

Aerial root bridges woven from giant tree roots hang over the gorge. They sway in the wind, creaking like a ship's timber. A razor-vine shortcut branches into a thorn-choked loop.

- **Exits: west** -> Canopy Edge (`sector9_wilds_overlook`); **south** -> Architect Gateway (`sector9_wilds_archway`); **north** -> Vine Climb (`sector9_ridge_climb`); **east** -> Hunter's Blind (`sector9_wilds_lookout`).
- **East lock:** Razor-vines choke the passage. The barbed stems will burst into toxic spores if cut cold. Requires `thermal_cutter`; consumed: False.
- **Direct encounters:** none; action-spawned encounters are separate.
- **razor-vine shortcut** (generic; object: razor-vine shortcut): The Thermal Cutter burns a clean path through the razor-vines, reopening the old canopy loop.
- **aerial root bridges** (generic; object: aerial root bridges): Thick braided roots stretch between ancient trees, forming natural elevated catwalks.

Architect Gateway (`sector9_wilds_archway`)

A massive, partially collapsed archway of smooth Architect stone rises above Aethel boundary stones. Faint cymatic glyphs flicker along the edges, pulsing in slow cycles.

- **Exits: north** -> Hanging Root Bridge (`sector9_wilds_canopy_walk`); **east** -> Beast Run (`sector9_wilds_dense_brush`).
- **Direct encounters:** shard_hound.
- **Aethel boundary stones** (generic; object: Aethel boundary stones): The archway translates swamp resonance into geometric light, the first threshold of the Sanctuary.

Beast Run (`sector9_wilds_dense_brush`)

A wide trail of trampled vines and broken tree trunks skirts a violet toxic bloom. Giant claw marks are scarred into the bark of the crystalline ferns near a lost surveyor pack caught in the thorns.

- **Exits: west** -> Architect Gateway (`sector9_wilds_archway`); **north** -> Burned Glade (`sector9_wilds_clearance`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **toxic bloom** (generic; object: toxic bloom): A violet bloom exhales corrosive spores. Holding your breath, you mark a safer return path.
- **lost surveyor pack** (container; object: lost surveyor pack): Open once for Antidote Flask, Medkit+, Ration Pack. Persisted state: `w2_surveyor_pack_opened`.

Burned Glade (`sector9_wilds_clearance`)

An open clearing ringed by shattered trunks and burned clean by old energy discharges. The ground is glazed like black glass, and the patrol transceiver pings beneath a collapsed slab.

- **Exits: south** -> Beast Run (`sector9_wilds_dense_brush`); **north** -> Hunter's Blind (`sector9_wilds_lookout`).
- **Direct encounters:** none; action-spawned encounters are separate.

- **patrol transceiver** (generic; object: patrol transceiver): Objective completed.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_transceiver_recovered"}`.
- Event `w2_sq02_recover_transceiver` prerequisites: `[{"type": "quest_active", "quest_id": "w2_sq02"}, {"type": "quest_task_not_done", "quest_id": "w2_sq02", "task_id": "recover_transceiver"}, {"type": "quest_task_done", "quest_id": "w2_sq02", "task_id": "trace_alpha"}, {"type": "quest_task_done", "quest_id": "w2_sq02", "task_id": "trace_beta"}, {"type": "quest_task_done", "quest_id": "w2_sq02", "task_id": "trace_gamma"}]`. See the numbered route for its quest/reward sequence.
- **shattered trunks** (generic; object: shattered trunks): Felled timber and torn roots show signs of recent heavy kinetic impacts.

Hunter's Blind (`sector9_wilds_lookout`)

A high, ruined lookout platform constructed from ancient blocks. Spent sniper casings litter the stone, still warm.

- **Exits: south** -> Burned Glade (`sector9_wilds_clearance`); **west** -> Hanging Root Bridge (`sector9_wilds_canopy_walk`).
- **West lock:** Razor-vines choke the passage. The barbed stems will burst into toxic spores if cut cold. Requires `thermal_cutter`; consumed: False.
- **Direct encounters:** none; action-spawned encounters are separate.
- **Cook** (rest_stop; object: heat ring cookfire): The Dominion heat ring provides steady cooking heat to roast skewers and prepare provisions. Cooking source: Campfire.
- **Rest** (rest_stop; object: ridge campsite): Resting beside the heat ring lets your party recover from the trail. Rest event: `w2_camp_wilds_lookout`.

Tideglass Beach (`tideglass_beach`)

Entry: **Mist Pools** (`sector9_stream_pools`). Entry policy: transition; return policy: entry.

Mist Pools (`sector9_stream_pools`)

Deep wetlands where the glowing water pools into wide, still basins. Reed bulbs push through the mineral fog, and a Siren Skimmer darts through the mist with a shrill, disorienting cry.

- **Exits: west** -> Stream Bank (`sector9_landing_stream`); **east** -> Crystalline Flats (`sector9_stream_flats`); **south** -> Resonant Sedge (`sector9_stream_wetlands`).
- **Direct encounters:** siren_skimmer.
- **reed bulbs** (generic; object: reed bulbs): Already harvested.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_herb_reeds_foraged"}`.
- Event `w2_forage_herb_reeds` prerequisites: `[{"type": "milestone_not_set", "milestone": "ms_w2_herb_reeds_foraged"}]`. See the numbered route for its quest/reward sequence.
- **still basins** (generic; object: still basins): Bioluminescent water settles into mirror-like pools reflecting the misty canopy above.

Resonant Sedge (`sector9_stream_wetlands`)

Dense sedge grasses with hollow, fluted stalks rise from the swamp. A handwritten spore warning sign leans in the muck as wind-sung reeds whistle in harmonic chords near a submerged emergency locker.

- **Exits: north** -> Mist Pools (`sector9_stream_pools`).

- **Direct encounters:** spore_spitter.
- **spore warning** (generic; object: spore warning): Amber sacs inflate along the path. Aethel markers identify the cloud as neurotoxic and harmful to Erosion control.
- **wind-sung reeds** (generic; object: wind-sung reeds): Hollow reed stalks whistle with harmonic frequencies as the coastal breeze passes through them.
- **submerged emergency locker** (container; object: submerged emergency locker): Open once for Antidote Flask, Pure Iron, Chemical Catalyst. Persisted state: `w2_wetlands_locker_opened`.

Crystalline Flats (`sector9_stream_flats`)

A wide, sandy delta where the stream spreads thin over a half-sunken causeway. The crystalline sand catches the blue light of the water, shimmering and vibrating with a faint hum when stepped on.

- **Exits: west** -> Mist Pools (`sector9_stream_pools`); **east** -> Resonant Falls (`sector9_stream_falls`); **north** -> Cavern Entrance (`sector9_stream_cave_entrance`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **half-sunken causeway** (generic; object: half-sunken causeway): Carved stones under the mud form an Aethel causeway aimed toward the Sanctuary Facility.
- **crystalline sand** (generic; object: crystalline sand): Fine blue silica crunches underfoot, sparkling with residual energy discharged by the tide.

Resonant Falls (`sector9_stream_falls`)

The stream cascades over stone pillars. Behind the falling water, a sheltered cookfire stays dry while David tends a brisket smoker. Penny the sheepadoodle watches over the camp from her camp bed, nudging everyone into a protective pack.

- **Exits: west** -> Crystalline Flats (`sector9_stream_flats`); **east** -> Beach Cliffs (`sector9_beach_cliffs`); **north** -> Beach Transition (`sector9_stream_tidepools`).
- **NPC:** David (`chef_david`).
- **NPC:** Penny (`hound_penny`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **Cook** (rest_stop; object: sheltered cookfire): A dry recess behind the falls stays warm and sheltered. Preparing hot broth over the flame restores focus. Cooking source: Campfire.
- **Rest** (rest_stop; object: recess shelter): The steady water-chord quiets the mental strain, letting your squad rest and recharge. Rest event: `w2_camp_stream_falls`.
- **provisions counter** (shop; object: provisions counter): Shop: `davids_provisions`.
- **penny camp bed** (inspect; object: penny camp bed): A soft nest of warm fleece towels beside the hearth. A heavily chewed pine branch and a clean water dish sit ready for whenever she finishes her shift guarding the camp.

Beach Transition (`sector9_stream_tidepools`)

The stream widens into brackish coastal pools. A tidepool crawler is trapped near the shallow margins where star crystals settle.

- **Exits: south** -> Resonant Falls (`sector9_stream_falls`); **north** -> Tide Pools (`sector9_beach_pools`); **east** -> Coastal Resilience Station (`sector9_coastal_research_station`).

- **Direct encounters:** none; action-spawned encounters are separate.
- **tidepool crawler** (generic; object: tidepool crawler): Already harvested.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_meat_tidepool_foraged"}`.
- Event `w2_forage_meat_tidepool` prerequisites: `[{"type": "milestone_not_set", "milestone": "ms_w2_meat_tidepool_foraged"}]`. See the numbered route for its quest/reward sequence.
- **star crystals** (generic; object: star crystals): Faceted mineral clusters grow in geometric clusters around the warm tide pools.

Cavern Entrance (`sector9_stream_cave_entrance`)

A dark cavern opens behind a waterfall curtain beneath the main shelf. Wet mist fills the air, and cave glyphs glimmer between patches of dripping moss on the smooth stone walls.

- **Exits: south** -> Crystalline Flats (`sector9_stream_flats`); **north** -> Glow-Moss Cavern (`sector9_stream_cave_depths`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **cave glyphs** (generic; object: cave glyphs): A light-mural maps surface water into the facility cooling system, joining swamp and Sanctuary as one machine.
- **waterfall curtain** (generic; object: waterfall curtain): A sheet of rushing water masks the cave mouth in a cool, misty spray.

Glow-Moss Cavern (`sector9_stream_cave_depths`)

A quiet cavern chamber lit blue by thick sheets of glowing moss. A waterproof cargo case rests against the rocks. An echo nest rings the far wall, and the damp stone carries the waterfall in a hollow rhythm.

- **Exits: south** -> Cavern Entrance (`sector9_stream_cave_entrance`); **east** -> Waterlogged Tunnel (`sector9_stream_sunken_passage`).
- **Direct encounters:** echo_borer.
- **echo nest** (generic; object: echo nest): Already harvested.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_meat_cave_foraged"}`.
- Event `w2_forage_meat_cave` prerequisites: `[{"type": "milestone_not_set", "milestone": "ms_w2_meat_cave_foraged"}]`. See the numbered route for its quest/reward sequence.
- **glowing moss** (generic; object: glowing moss): Thick velvet sheets of cyan moss illuminate the stone chamber in soothing ambient light.
- **waterproof cargo case** (generic; object: waterproof cargo case): A buoyant cargo canister washed against the glow-moss rocks.
- Event `find_vhs_tape_03` prerequisites: `[]`. See the numbered route for its quest/reward sequence.

Waterlogged Tunnel (`sector9_stream_sunken_passage`)

A narrow tunnel where the cavern roof dips close to the glowing water. A warm current runs past a drowned console and an ancient brass sluice wheel. The southern passage is fully submerged beneath churning runoff.

- **Exits: west** -> Glow-Moss Cavern (`sector9_stream_cave_depths`); **north** -> Hidden Grotto (`sector9_beach_grotto`); **south** -> Submerged Aethel Vault (`sector9_sunken_aethel_vault`).

- **South lock:** A churning surge of dark swamp runoff completely submerges the southern archway. You cannot dive through without drowning in the undertow. Required room state: [{"room_id": "sector9_stream_sunken_passage", "state_key": "sluice_drained", "value": true}].
- **Direct encounters:** none; action-spawned encounters are separate.
- **ancient sluice wheel** (toggle; object: ancient sluice wheel): Heavy brass spokes connect to ancient hydraulic gates below.
- **drowned console** (generic; object: drowned console): The Aethel console still projects one phrase: THE OCEAN ENTERS THROUGH EVERY CRACK.
- **warm current** (generic; object: warm current): Subterranean runoff warms the passage, carrying faint mineral notes from deep below.

Beach Cliffs (`sector9_beach_cliffs`)

High basalt cliffs overlook the beach, where a sun-bleached driftwood marker and a weathered elephant toy rest in a warm hollow near the edge. Below, a signal reflection stutters across the glowing shoreline of Tideglass Beach.

- **Exits: west** -> Resonant Falls (`sector9_stream_falls`); **north** -> Coastal Resilience Station (`sector9_coastal_research_station`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **signal reflection** (generic; object: signal reflection): Three distant beacon reflections stutter across the tideglass. One carries a Dominion patrol code.
- Event `w2_sq02_trace_cliffs` prerequisites: `[]`. See the numbered route for its quest/reward sequence.
- **basalt cliffs** (generic; object: basalt cliffs): Sheer volcanic columns rise against the tidal surf, worn smooth by centuries of mineral spray.
- **driftwood marker** (inspect; object: driftwood marker): A weathered piece of sea-bleached driftwood planted in the cliffside grass, carved with two simple words: 'GO BEACH.' Beside it, petrified in the stone sand, are small, playful paw prints leading toward the warmest patch of afternoon sun.
- **weathered elephant toy** (inspect; object: weathered elephant toy): A small, resilient fabric elephant toy tucked into a sunny hollow in the basalt rock. Softened by years of affection, it rests peacefully beside the driftwood marker, looking out over the quiet tide.

Sandy Cove (`sector9_beach_cove`)

A sheltered, sandy beach protected by tall stone walls. The warm sand is dry, making it a safe place to set up a campfire and rest. Stranded scout Kaelen tends a low grill over the flames.

- **Exits: south** -> Coastal Resilience Station (`sector9_coastal_research_station`); **west** -> Tide Pools (`sector9_beach_pools`).
- **NPC:** Scout Kaelen (`scout_kaelen`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **Cook** (rest_stop; object: campfire): The sheltered beach fire is ready for cooking. Cooking source: Campfire.
- **warm sand** (generic; object: warm sand): Deep volcanic sand retains daytime heat, sheltered from high winds by coastal bluffs.

Tide Pools (`sector9_beach_pools`)

Glowing tide pools collect in the sand around luminescent anemones, calm enough for fishing beneath the pale blue fog. Bioluminescent weeds pulse near the shore where you can gather tideglass for Orion's recipe.

- **Exits: east** -> Sandy Cove (`sector9_beach_cove`); **west** -> Beached Cargo Wreck (`sector9_beach_cargo`); **north** -> Sea Cavern (`sector9_beach_cave`); **south** -> Beach Transition (`sector9_stream_tidepools`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **pools** (generic; object: pools): The water hums with a deep subsonic tone, washing away local static.
- **tide fishing** (fishing; object: tide fishing): The tide pools are calm enough for fishing.
- **scan weeds** (generic; object: scan weeds): Objective completed.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_flora_weeds_scanned"}`.
- Event `w2_sq01_scan_weeds` prerequisites: `[{"type": "quest_active", "quest_id": "w2_sq01"}, {"type": "quest_task_not_done", "quest_id": "w2_sq01", "task_id": "scan_flora_2"}]`. See the numbered route for its quest/reward sequence.
- **gather tideglass** (generic; object: gather tideglass): Glowing tideglass skewers are harvested from the shore.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_tideglass_gathered"}`.
- Event `w2_sq03_gather` prerequisites: `[{"type": "quest_active", "quest_id": "w2_sq03"}, {"type": "quest_task_done", "quest_id": "w2_sq03", "task_id": "visit_beach"}, {"type": "quest_task_not_done", "quest_id": "w2_sq03", "task_id": "collect_food"}]`. See the numbered route for its quest/reward sequence.
- **luminescent anemones** (generic; object: luminescent anemones): Delicate tidepool flora pulse in rhythmic intervals synchronized with the distant barrier frequency.

Beached Cargo Wreck (`sector9_beach_cargo`)

A Dominion cargo container lies split open on the sand, its rusted hull stripped of doors. Sea-grass has claimed the interior, but crates of scrap metal are still visible.

- **Exits: east** -> Tide Pools (`sector9_beach_pools`); **north** -> Star-Sand Dunes (`sector9_beach_dunes`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **crates** (container; object: crates): Open once for Scrap Metal, Composite Plate, Hydraulic Fluid, Nano Filament. Persisted state: `w2_beach_crates_opened`.
- **rusted hull** (generic; object: rusted hull): Barnacles and salt crystals encrust the shipping container's battered exterior.

Sea Cavern (`sector9_beach_cave`)

A high-ceilinged cavern carved by the waves. Abandoned bedroll hooks mark a mineral shelter beneath the soot-blackened ceiling, where a tide-worn chest rests safe from the spray. Water drains through fissures in the stone, creating hissing blowholes that spray fine mist into the dark.

- **Exits: south** -> Tide Pools (`sector9_beach_pools`); **north** -> Sunken Obelisk (`sector9_beach_pillar`); **east** -> Hidden Grotto (`sector9_beach_grotto`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **mineral shelter** (generic; object: mineral shelter): Old bedroll hooks and a soot-blackened ceiling mark a patrol shelter abandoned in a hurry.

- **tide-worn chest** (container; object: tide-worn chest): Open once for Bioluminescent Lure, Tideglass Delight, Cooling Burn Salve. Persisted state: `w2_sea_cavern_chest_opened`.

Sunken Obelisk (`sector9_beach_pillar`)

A colossal stone obelisk sits half-submerged in the surf. Ancient cymatic engravings cover the resonant pillar, glowing faintly as the tide rolls over them.

- **Exits: south** -> Sea Cavern (`sector9_beach_cave`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **resonant pillar** (generic; object: resonant pillar): Touching the pillar sends a clean note through the beach and answers a deeper tone beneath the facility.

Hidden Grotto (`sector9_beach_grotto`)

A small, dry alcove hidden behind a basalt pillar opens beneath sea-worn arches. A cache rests near the waterline, while a bioluminescent prism glows among the smooth crystal clusters lining the cave walls.

- **Exits: west** -> Sea Cavern (`sector9_beach_cave`); **south** -> Waterlogged Tunnel (`sector9_stream_sunken_passage`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **cache** (generic; object: cache): Objective completed.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_grotto_relic_gathered"}`.
- Event `w2_sq03_gather_relic` prerequisites: `[]`. See the numbered route for its quest/reward sequence.
- **sea-worn arches** (generic; object: sea-worn arches): Twin stone arches form a natural amphitheater where incoming waves echo in deep hollow notes.
- **bioluminescent prism** (tuning_puzzle; object: bioluminescent prism): The ancient crystal prism glows faintly in the sea cavern mist. Puzzle: `w2_biolum_matrix_tune`.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_relic_w2_biolum_solved"}`.

Star-Sand Dunes (`sector9_beach_dunes`)

Wind-sculpted ridges of fine crystalline sand sparkle in the dim light. A burrowing grazer ripples under the warm sand, and each step rings softly.

- **Exits: south** -> Beached Cargo Wreck (`sector9_beach_cargo`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **burrowing grazer** (generic; object: burrowing grazer): Already harvested.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_meat_dunes_foraged"}`.
- Event `w2_forage_meat_dunes` prerequisites: `[{"type": "milestone_not_set", "milestone": "ms_w2_meat_dunes_foraged"}]`. See the numbered route for its quest/reward sequence.
- **wind-sculpted ridges** (generic; object: wind-sculpted ridges): Shifting blue dunes create sweeping wave patterns across the coastal expanse.

Coastal Resilience Station (`sector9_coastal_research_station`)

A weather-hardened eco-station perches over tidal wetlands and sea bluffs. Acoustic sediment sensors pulse against the marsh silt, while a wetland telemetry array maps coastal marsh restoration and water filtration under the salty ocean breeze. On the clinician's desk, a forensic research slate rests beside a warm solar coffee press.

- **Exits: west** -> Beach Transition (`sector9_stream_tidepools`); **south** -> Beach Cliffs (`sector9_beach_cliffs`); **north** -> Sandy Cove (`sector9_beach_cove`).
- **NPC:** Megan (`clinician_megan`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **wetland telemetry array** (inspect; object: wetland telemetry array): A bank of holographic water-quality sensors and tidal gauges monitoring marsh vegetation density and sediment stability across Sector 9's coastline. An IT tech's sticky note reads: 'If the telemetry drops, check the grounding wire before calling Jason.'
- **forensic research slate** (inspect; object: forensic research slate): A diagnostic terminal analyzing trace contaminants and environmental trauma with the meticulous rigor of a courtroom forensic dossier. Redlined notes identify upstream industrial run-off.
- **solar coffee press** (inspect; object: solar coffee press): A warm glass carafe of dark roast coffee sitting on a solar heater beside a handwritten note: 'Drink water, stretch your back, and stop reading autopsy reports at 2 AM.'

Submerged Aethel Vault (`sector9_sunken_aethel_vault`)

Ancient basalt pillars support a domed chamber carved from living coral. Drainage slits in the floor channel the remaining brine away from an ornate Precursor reliquary resting upon a dry central dais.

- **Exits: north** -> Waterlogged Tunnel (`sector9_stream_sunken_passage`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **precursor reliquary** (container; object: precursor reliquary): Open once for Tidal Resonator, Astral Thread, Bioluminescent Lure. Persisted state: `w2_sunken_vault_chest_opened`.
- **living coral** (inspect; object: living coral): Deep cyan and amber polyps pulse gently in time with the tide, calcified around Aethel harmonic conductors that have survived centuries under water.

Canopy Ridge (`canopy_ridge`)

Entry: **Canopy Ridge** (`sector9_canopy_ridge`). Entry policy: transition; return policy: entry.

Vine Climb (`sector9_ridge_climb`)

A sheer cliff wall covered in thick, climbable root-vines. A medic satchel hangs snagged among them. The climb is steep, but the roots are strong and offer stable handholds.

- **Exits: west** -> Patrol Graveyard (`sector9_wilds_grave`); **south** -> Hanging Root Bridge (`sector9_wilds_canopy_walk`); **north** -> Windy Ledges (`sector9_ridge_ledges`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **medic satchel** (generic; object: medic satchel): The satchel is empty except for notes describing Neural Stabilizers as temporary anchors against Erosion.

Windy Ledges (`sector9_ridge_ledges`)

High stone shelves swept by cold upper-atmosphere wind. A blue-frond cluster clings to a sheltered crack. The ambient sound of the winds whistling through the gaps forms a low chord.

- **Exits: south** -> Vine Climb (`sector9_ridge_climb`); **north** -> Beast Lair Approach (`sector9_ridge_overhang`).
- **Direct encounters:** echo_borer.
- **blue-frond cluster** (generic; object: blue-frond cluster): Already harvested.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_herb_ridge_foraged"}`.
- Event `w2_forage_herb_ridge` prerequisites: `[{"type": "milestone_not_set", "milestone": "ms_w2_herb_ridge_foraged"}]`. See the numbered route for its quest/reward sequence.

Beast Lair Approach (`sector9_ridge_overhang`)

The approach to a massive dark overhang in the cliff face, where rain has exposed a weathered mural. A heavy, musky scent hangs in the cold air, and deep growls echo.

- **Exits: south** -> Windy Ledges (`sector9_ridge_ledges`); **north** -> Canopy Ridge (`sector9_canopy_ridge`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **weathered mural** (generic; object: weathered mural): Rain exposes a mural: human figures rendered as ice, listening to the vast Ocean beneath them.

Canopy Ridge (`sector9_canopy_ridge`)

A stone shelf stands above the canopy beneath the distant ceiling of the Planetary Shield; a rifle barrel tracks the ridge from the brush, forcing you to confront the stalker before the angle closes.

- **Exits: south** -> Beast Lair Approach (`sector9_ridge_overhang`); **east** -> Shield Viewpoint (`sector9_ridge_viewpoint`).
- **NPC:** Gh0st (`gh0st`); requires milestones ms_w2_beast_defeated; absent after ms_w2_mq05_complete. While visible, quest dialogue eligibility still applies.
- **Direct encounters:** none; action-spawned encounters are separate.
- **Look at Shield** (generic; object: Look at Shield): The Planetary Shield curves across the sky, pulsing in a timed pattern.
- **Confront stalker** (generic; object: Confront stalker): Confront the hunter waiting in the shadows.
- Action visibility/requirements: `{"show_when_milestone": "ms_w2_mq03_complete", "hide_when_state": "hunter_confronted"}`.
- Event `w2_mq04_confront` prerequisites: `[{"type": "quest_active", "quest_id": "w2_mq04"}, {"type": "quest_task_not_done", "quest_id": "w2_mq04", "task_id": "confront_stalker"}]`. See the numbered route for its quest/reward sequence.
- **Face the Beast** (generic; object: Face the Beast): The Beast tears through the brush while Gh0st's trigger channel remains empty.
- Action visibility/requirements: `{"show_when_state": "hunter_confronted", "hide_when_state": "beast_defeated"}`.
- Event `w2_mq04_beast_ambush` prerequisites: `[{"type": "quest_active", "quest_id": "w2_mq04"}, {"type": "quest_task_done", "quest_id": "w2_mq04", "task_id": "confront_stalker"}, {"type": "quest_task_not_done", "quest_id": "w2_mq04", "task_id": "defeat_the_beast"}]`. See the numbered route for its quest/reward sequence.
- **Anchor Drill** (generic; object: Anchor Drill): Objective completed.

- Action visibility/requirements: `{"show_when_state": "beast_defeated", "hide_when_state": "anchor_drill_complete", "requires_milestone_not_set": "ms_w2_mq04_complete"}`.
- Event `w2_mq04_anchor_drill` prerequisites: `[{"type": "quest_active", "quest_id": "w2_mq04"}, {"type": "quest_task_done", "quest_id": "w2_mq04", "task_id": "defeat_the_beast"}, {"type": "quest_task_not_done", "quest_id": "w2_mq04", "task_id": "complete_anchor_drill"}]`. See the numbered route for its quest/reward sequence.

Shield Viewpoint (`sector9_ridge_viewpoint`)

An open observation platform on the edge of the ridge offers a clear facility sightline through the green canopy. The Planetary Shield grid is directly visible, pulsing in timed waves.

- **Exits: west** -> Canopy Ridge (`sector9_canopy_ridge`); **north** -> Sniper Lookout (`sector9_ridge_sniper_perch`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **facility sightline** (generic; object: facility sightline): Sterile white towers emerge from living green. Root and conduit follow the same branching pattern.

Sniper Lookout (`sector9_ridge_sniper_perch`)

A narrow shelf near the summit offering a perfect view of the Canopy Ridge. Distress signature gamma flashes across abandoned spotting gear and ammo cases.

- **Exits: south** -> Shield Viewpoint (`sector9_ridge_viewpoint`); **east** -> High Pass (`sector9_ridge_crevice`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **distress signature gamma** (generic; object: distress signature gamma): Objective completed.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_beacon_gamma_traced"}`.
- Event `w2_sq02_trace_gamma` prerequisites: `[{"type": "quest_active", "quest_id": "w2_sq02"}, {"type": "quest_task_not_done", "quest_id": "w2_sq02", "task_id": "trace_gamma"}]`. See the numbered route for its quest/reward sequence.

High Pass (`sector9_ridge_crevice`)

A narrow crevice follows a fault line through the mountain stone. A thorn mat conceals a razor-vine cache. The walls are so close they block out the wind, creating an eerie, absolute silence.

- **Exits: west** -> Sniper Lookout (`sector9_ridge_sniper_perch`); **east** -> Sanctuary Outlook (`sector9_ridge_plateau`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **razor-vine cache** (generic; object: razor-vine cache): The Thermal Cutter parts the thorn mat without bursting its toxic seed pods, exposing an old supply niche.
- **fault line** (generic; object: fault line): A jagged split in the bedrock reveals strata rich in conducting crystal veins.

Sanctuary Outlook (`sector9_ridge_plateau`)

A high stone plateau directly facing the Temple facades. A ridge overlook cache sits near the edge. The stone steps leading to the gateway are worn but stable.

- **Exits: west** -> High Pass (`sector9_ridge_crevice`); **east** -> Stone Courtyard (`sector9_temple_plaza`).
- **Direct encounters:** none; action-spawned encounters are separate.

- **Cook** (rest_stop; object: stone cookfire): The warm stone plateau makes an ideal spot to boil water and cook restorative fish stew. Cooking source: Campfire.
- **Rest** (rest_stop; object: plateau camp): Shared rest and quiet contemplation on the warm stone restore focus before the temple. Rest event: `w2_camp_ridge_plateau`.
- **ridge overlook cache** (generic; object: ridge overlook cache): A stone cache overlooking the dark canopy and ocean swells.
- Event `find_vhs_tape_04` prerequisites: `[]`. See the numbered route for its quest/reward sequence.

Temple Gate (`temple_gate`)

Entry: **Temple Gate** (`sector9_temple_gate`). Entry policy: transition; return policy: entry.

Stone Courtyard (`sector9_temple_plaza`)

A symmetric flagstone courtyard spreads before the gate beneath a processional mural. Geometric lines are carved into the ground, pulsing with a faint blue light.

- **Exits: west** -> Sanctuary Outlook (`sector9_ridge_plateau`); **east** -> Resonator Chamber (`sector9_temple_lock_chamber`); **north** -> Outer Guard Post (`sector9_temple_vestibule`).
- **Direct encounters:** spore_spitter.
- **processional mural** (generic; object: processional mural): Light figures carry bowls of Ocean-water inward while crystalline human shapes carry memory outward.
- **flagstone courtyard** (generic; object: flagstone courtyard): Weathered geometric tiles align toward the temple portal with uncanny precision.

Outer Guard Post (`sector9_temple_vestibule`)

A ruined outpost containing deactivated Dominion defense turrets and an old sanitation console. Rust and moss have fused the turret gears together.

- **Exits: south** -> Stone Courtyard (`sector9_temple_plaza`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **sanitation console** (generic; object: sanitation console): The console once stripped toxic spores from pilgrims before admitting them to the Sanctuary.

Resonator Chamber (`sector9_temple_lock_chamber`)

The resonator console chamber in front of the gate. Two tuning wings flank a central slot designed to hold the Chime.

- **Exits: west** -> Stone Courtyard (`sector9_temple_plaza`); **north** -> Left Tuner Column (`sector9_temple_left_wing`); **south** -> Right Tuner Column (`sector9_temple_right_wing`); **east** -> Temple Gate (`sector9_temple_gate`).
- **NPC:** Sentinel-3 (`sentinel_3`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **Sentinel Scraps** (shop; object: Sentinel Scraps): Shop: `sentinel_scraps`.

Left Tuner Column (`sector9_temple_left_wing`)

The left resonator battery column holds the western resonance crystal in a copper-wired pillar that vibrates in low harmony.

- **Exits: south** -> Resonator Chamber (`sector9_temple_lock_chamber`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **western resonance crystal** (generic; object: western resonance crystal): A violet crystal stores the low harmony missing from the stasis mural.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_crystal_west_seated"}`.
- Event `w2_sq04_crystal_west` prerequisites: `[{"type": "quest_active", "quest_id": "w2_sq04"}, {"type": "quest_task_not_done", "quest_id": "w2_sq04", "task_id": "crystal_west"}]`. See the numbered route for its quest/reward sequence.

Right Tuner Column (`sector9_temple_right_wing`)

The right frequency dampener column holds the eastern resonance crystal, filtering local seismic noise into an answering harmonic.

- **Exits: north** -> Resonator Chamber (`sector9_temple_lock_chamber`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **eastern resonance crystal** (generic; object: eastern resonance crystal): A cyan crystal holds the answering harmonic from the facility east wing.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_crystal_east_seated"}`.
- Event `w2_sq04_crystal_east` prerequisites: `[{"type": "quest_active", "quest_id": "w2_sq04"}, {"type": "quest_task_not_done", "quest_id": "w2_sq04", "task_id": "crystal_east"}]`. See the numbered route for its quest/reward sequence.

Temple Gate (`sector9_temple_gate`)

A massive stone door, perfectly smooth, stands embedded in the cliff. It is engraved with glowing cymatic patterns, and the stone lock has a slot shaped like the Chime in the center of a metal resonator.

- **Exits: west** -> Resonator Chamber (`sector9_temple_lock_chamber`); **east** -> Sanctuary Grand Hall (`sector9_foyer_grand_hall`).
- **East lock:** The Temple Gate is sealed. Use the Chime at the stone lock after clearing the canopy route. Required room state: [{"room_id": "sector9_temple_gate", "state_key": "temple_open", "value": true}].
- **Direct encounters:** none; action-spawned encounters are separate.
- **stone lock** (generic; object: stone lock): Objective completed.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_mq02_complete"}`.
- Event `w2_mq02_unlock_temple` prerequisites: `[{"type": "quest_active", "quest_id": "w2_mq02"}, {"type": "quest_task_done", "quest_id": "w2_mq02", "task_id": "locate_temple_gate"}, {"type": "quest_task_done", "quest_id": "w2_mq02", "task_id": "clear_canopy_path"}]`. See the numbered route for its quest/reward sequence.

Hall of Echoes (`hall_of_echoes`)

Entry: **Hall of Echoes** (`sector9_hall_of_echoes`). Entry policy: transition; return policy: entry.

Sanctuary Grand Hall (`sector9_foyer_grand_hall`)

A colossal foyer of clean, ancient geometry surrounds a welcome console. The air is cool and dry, and faint bands of light shimmer along the floor.

- **Exits: west** -> Temple Gate (`sector9_temple_gate`); **north** -> Left Reliquary (`sector9_foyer_left_gallery`); **south** -> Right Archives (`sector9_foyer_right_gallery`); **east** -> Hall of Echoes (`sector9_hall_of_echoes`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **welcome console** (generic; object: welcome console): Aethel text calls this place a shore: a safe edge where minds of Ice could approach the Ocean.

Left Reliquary (`sector9_foyer_left_gallery`)

A wide alcove showing cracked Architect resonance crystals displayed on stone pedestals beside a botanical research log. The crystals hum in discord.

- **Exits: south** -> Sanctuary Grand Hall (`sector9_foyer_grand_hall`); **west** -> Dominion Outpost (`sector9_foyer_security_hub`).
- **Direct encounters:** ruin_guardian.
- **botanical research log** (generic; object: botanical research log): The log confirms the swamp was cultivated to filter Source resonance, not allowed to overtake the facility.

Right Archives (`sector9_foyer_right_gallery`)

A gallery lined with stone data columns and a light-mural procession. The columns show old wave logs and frequency diagrams etched in light.

- **Exits: north** -> Sanctuary Grand Hall (`sector9_foyer_grand_hall`); **east** -> Hangar Portal (`sector9_foyer_vault_door`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **light-mural procession** (generic; object: light-mural procession): Sterile panels bloom into wetland colors as you pass, erasing the boundary between vault and jungle.

Dominion Outpost (`sector9_foyer_security_hub`)

An abandoned security outpost. A terminal screen glows orange, reporting a breach in the stasis grid.

- **Exits: east** -> Left Reliquary (`sector9_foyer_left_gallery`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **terminal** (generic; object: terminal): Hacking the security database reports status: LOCKDOWN.

Hangar Portal (`sector9_foyer_vault_door`)

A heavy blast door blocking access to the hangar bay bears a security palimpsest of layered warnings. Security conduits run from the door frame into the vents.

- **Exits: west** -> Right Archives (`sector9_foyer_right_gallery`); **east** -> Maintenance Conduit (`sector9_conduit_crawlspace`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **security palimpsest** (generic; object: security palimpsest): Layered warnings describe resonance overload as Erosion and prescribe chemical neural stabilization.

Maintenance Conduit (`sector9_conduit_crawlspace`)

A dark, cramped ventilation crawlspace filled with bundles of thick optical wires and cooling conduits. Glowing maintenance spores drift from fungus clinging to the warm pipes.

- **Exits: west** -> Hangar Portal (`sector9_foyer_vault_door`); **east** -> T-Junction Wiring (`sector9_conduit_junction`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **maintenance spores** (generic; object: maintenance spores): Bioluminescent fungus feeds on warm conduit leakage. Its spores numb exposed skin.

T-Junction Wiring (`sector9_conduit_junction`)

A junction point inside the crawlspace. A service map marks wire channels splitting off to the stasis deck and generator breakers.

- **Exits: west** -> Maintenance Conduit (`sector9_conduit_crawlspace`); **north** -> Access Shaft (`sector9_conduit_access_shaft`); **south** -> Breaker Deck (`sector9_conduit_breaker_room`).
- **Direct encounters:** sentinel_orb.
- **service map** (generic; object: service map): The map reveals a return duct linking the Hall of Echoes to the foyer security hub.

Breaker Deck (`sector9_conduit_breaker_room`)

An auxiliary generator cabin. Offline breakers hum with static, ready to be flipped to align stasis diagnostics. An insulated technician toolbox sits beside the cable duct.

- **Exits: north** -> T-Junction Wiring (`sector9_conduit_junction`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **breakers** (generic; object: breakers): Flipping the auxiliary breaker alignment...
- **technician toolbox** (container; object: technician toolbox): Open once for Rapid Capacitor, Wiring Bundle, Pure Iron. Persisted state: `w2_breaker_toolbox_opened`.

Access Shaft (`sector9_conduit_access_shaft`)

A vertical access shaft with a rusted ladder offers a shaft shortcut into the vents. Steam escapes from pipes along the shaft walls, making the rungs slick.

- **Exits: south** -> T-Junction Wiring (`sector9_conduit_junction`); **north** -> High Gantry (`sector9_vents_gantry`).
- **North lock:** Razor-vines choke the passage. The barbed stems will burst into toxic spores if cut cold. Requires `thermal_cutter`; consumed: False.
- **Direct encounters:** none; action-spawned encounters are separate.
- **shaft shortcut** (generic; object: shaft shortcut): The Thermal Cutter clears roots fused around the access ladder, reopening the climb into the vents.

Hall of Echoes (`sector9_hall_of_echoes`)

A grand corridor of clean, ancient geometry. The air is cool and dry. Shifting murals wash across the walls while a central relief waits beneath three empty crystal shadows.

- **Exits: west** -> Sanctuary Grand Hall (`sector9_foyer_grand_hall`); **north** -> Echo Alcoves (`sector9_hall_echo_alcoves`); **east** -> Archive Vault (`sector9_archive_vault`); **south** -> Stasis Chamber (`sector9_stasis_chamber`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **murals** (generic; object: murals): Objective completed.

- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_murals_inspected"}`.
- Event `w2_mq03_inspect_murals` prerequisites: `[{"type": "quest_active", "quest_id": "w2_mq03"}, {"type": "quest_task_not_done", "quest_id": "w2_mq03", "task_id": "inspect_murals"}]`. See the numbered route for its quest/reward sequence.
- **central relief** (generic; object: central relief): The central relief hums out of tune. It needs the west, east, and north crystal voices seated before the mural chord can hold.
- Action visibility/requirements: `{"requires_milestones": ["ms_w2_crystal_west_seated", "ms_w2_crystal_east_seated", "ms_w2_crystal_north_seated"], "requires_milestone_not_set": "ms_w2_sq04_complete"}`.
- Event `w2_sq04_complete` prerequisites: `[{"type": "quest_active", "quest_id": "w2_sq04"}, {"type": "quest_task_not_done", "quest_id": "w2_sq04", "task_id": "mural_tuning"}, {"type": "quest_task_done", "quest_id": "w2_sq04", "task_id": "crystal_west"}, {"type": "quest_task_done", "quest_id": "w2_sq04", "task_id": "crystal_east"}, {"type": "quest_task_done", "quest_id": "w2_sq04", "task_id": "crystal_north"}, {"type": "milestone_set", "milestone": "ms_w2_crystal_west_seated"}, {"type": "milestone_set", "milestone": "ms_w2_crystal_east_seated"}, {"type": "milestone_set", "milestone": "ms_w2_crystal_north_seated"}]`. See the numbered route for its quest/reward sequence.

Echo Alcoves (`sector9_hall_echo_alcoves`)

Small side alcoves designed for private study. A choir alcove log projects shifting light waveforms, detailing how separate minds once held a shared current without dissolving into it.

- **Exits: south** -> Hall of Echoes (`sector9_hall_of_echoes`); **north** -> Acoustics Lab (`sector9_hall_acoustics_lab`); **east** -> Cymatic Basin (`sector9_hall_reflection_pool`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **choir alcove log** (generic; object: choir alcove log): Each alcove preserved one voice so no single mind had to hold the Ocean alone.

Acoustics Lab (`sector9_hall_acoustics_lab`)

A laboratory bay containing Dominion logging sensors focused on cymatic pool fluctuations. The northern resonance crystal hums inside a sealed acoustic rack.

- **Exits: south** -> Echo Alcoves (`sector9_hall_echo_alcoves`).
- **Direct encounters:** spore_spitter.
- **northern resonance crystal** (generic; object: northern resonance crystal): A gold crystal vibrates at the mural alignment frequency.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_crystal_north_seated"}`.
- Event `w2_sq04_crystal_north` prerequisites: `[{"type": "quest_active", "quest_id": "w2_sq04"}, {"type": "quest_task_not_done", "quest_id": "w2_sq04", "task_id": "crystal_north"}]`. See the numbered route for its quest/reward sequence.

Cymatic Basin (`sector9_hall_reflection_pool`)

A circular reflection pool holds heavy mineral water. Waves on its surface form standing geometric shapes.

- **Exits: west** -> Echo Alcoves (`sector9_hall_echo_alcoves`).
- **Direct encounters:** none; action-spawned encounters are separate.

- **reflection pool** (generic; object: reflection pool): Your reflection fractures into ice-bright facets while the water beneath remains a single dark Ocean.

Archive Vault (`sector9_archive_vault`)

A circular archive vault filled with hollow stone cylinders. The cylinders hum softly when touched; one bears the Aethel extinction log.

- **Exits: west** -> Hall of Echoes (`sector9_hall_of_echoes`); **east** -> Interface Console (`sector9_archive_reading_room`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **Aethel extinction log** (generic; object: Aethel extinction log): The final entry rejects conquest: pain came from treating the Source as an object rather than an Ocean.

Interface Console (`sector9_archive_reading_room`)

A console room with a glowing research terminal. Caretaker Echo hovers beside the stone pillar as old Architect diagnostics flicker across its interface panel in slow wave loops.

- **Exits: west** -> Archive Vault (`sector9_archive_vault`); **south** -> Tuning Matrix (`sector9_archive_tuning_bay`).
- **NPC:** Caretaker Echo (`caretaker_drone`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **research terminal** (generic; object: research terminal): A clinical note defines Erosion as cognitive shear caused by incompatible resonance memories.

Tuning Matrix (`sector9_archive_tuning_bay`)

Four resonator columns stand around a low stone socket bed. Three empty seats wait for crystal voices from the west, east, and north wings before the mural chord can settle.

- **Exits: north** -> Interface Console (`sector9_archive_reading_room`); **east** -> Hidden Reliquary (`sector9_archive_secret_stash`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **resonator columns** (generic; object: resonator columns): The columns answer with three missing tones. Seat the west, east, and north crystal voices before asking them to carry the mural chord.
- Action visibility/requirements: `{"requires_milestones": ["ms_w2_crystal_west_seated", "ms_w2_crystal_east_seated", "ms_w2_crystal_north_seated"], "requires_milestone_not_set": "ms_w2_sq04_complete"}`.
- Event `w2_sq04_complete` prerequisites: `[{"type": "quest_active", "quest_id": "w2_sq04"}, {"type": "quest_task_not_done", "quest_id": "w2_sq04", "task_id": "mural_tuning"}, {"type": "quest_task_done", "quest_id": "w2_sq04", "task_id": "crystal_west"}, {"type": "quest_task_done", "quest_id": "w2_sq04", "task_id": "crystal_east"}, {"type": "quest_task_done", "quest_id": "w2_sq04", "task_id": "crystal_north"}, {"type": "milestone_set", "milestone": "ms_w2_crystal_west_seated"}, {"type": "milestone_set", "milestone": "ms_w2_crystal_east_seated"}, {"type": "milestone_set", "milestone": "ms_w2_crystal_north_seated"}]`. See the numbered route for its quest/reward sequence.

Hidden Reliquary (`sector9_archive_secret_stash`)

A labeled calibration record sits behind the opened pedestal glass. Its diagrams separate four carrier bands around a physical ground lead, beside a sealed relic coffer inlaid with resonant copper.

- **Exits: west** -> Tuning Matrix (`sector9_archive_tuning_bay`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **pedestal** (generic; object: pedestal): The Bridge calibration record lists consent checks, separate carriers, and a mandatory ground.
- Event `w2_sq04_decode_bridge_record` prerequisites: `[{"type": "quest_completed", "quest_id": "w2_sq04"}, {"type": "milestone_not_set", "milestone": "ms_w2_bridge_record_decoded"}]`. See the numbered route for its quest/reward sequence.
- **relic coffer** (container; object: relic coffer): Open once for Astral Thread, Bioluminescent Focus, Energy Core. Persisted state: `w2_relic_coffer_opened`.

Stasis Chamber (`stasis_chamber`)

Entry: **Stasis Chamber** (`sector9_stasis_chamber`). Entry policy: transition; return policy: entry.

Stasis Chamber (`sector9_stasis_chamber`)

A circular room gathers around a single humming stasis pod. A root lattice pulses through cracks in the floor, and a ceiling vent cuts a narrow shadow above the chamber wall.

- **Exits: north** -> Hall of Echoes (`sector9_hall_of_echoes`); **east** -> Ring Array (`sector9_stasis_ring_array`); **south** -> Source Gate (`sector9_source_gate`).
- **NPC:** Zeke (`zeke`); requires milestones ms_w2_mq01_complete; absent after ms_w2_mq05_complete. While visible, quest dialogue eligibility still applies.
- **NPC:** Orion (`orion`); requires milestones ms_w2_stasis_awake; absent after ms_w2_mq03_complete. While visible, quest dialogue eligibility still applies.
- **Direct encounters:** none; action-spawned encounters are separate.
- **stasis pod** (generic; object: stasis pod): Objective completed.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_pod_inspected"}`.
- Event `w2_mq03_inspect_pod` prerequisites: `[{"type": "quest_active", "quest_id": "w2_mq03"}, {"type": "milestone_not_set", "milestone": "ms_w2_stasis_pod_read"}]`. See the numbered route for its quest/reward sequence.
- **root lattice** (generic; object: root lattice): Objective completed.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_roots_scanned"}`.
- Event `w2_sq01_scan_roots` prerequisites: `[{"type": "quest_active", "quest_id": "w2_sq01"}, {"type": "quest_task_not_done", "quest_id": "w2_sq01", "task_id": "scan_flora_5"}]`. See the numbered route for its quest/reward sequence.
- **ceiling vent** (generic; object: ceiling vent): The ventilation shaft above leads toward the high gantry and infiltration hatch; its scrape marks are newer than the dust.
- **sealed Bridge cradle** (generic; object: sealed Bridge cradle): Talk to Orion before opening the separate Bridge cradle.
- Action visibility/requirements: `{"show_when_milestone": "ms_w2_orion_briefed", "requires_milestone_not_set": "ms_w2_bridge_recovered"}`.
- Event `w2_mq03_recover_bridge` prerequisites: `[{"type": "quest_active", "quest_id": "w2_mq03"}, {"type": "quest_task_done", "quest_id": "w2_mq03", "task_id": "talk_to_orion"}, {"type": "quest_task_not_done", "quest_id": "w2_mq03", "task_id": "recover_bridge_relic"}]`. See the numbered route for its quest/reward

sequence.

Ring Array (`sector9_stasis_ring_array`)

The ring console controls three concentric stasis rings. The alignment indicators hum with discordant tones, waiting for the mural pattern, pod pressure, overview sockets, and coolant flow to agree.

- **Exits: west** -> Stasis Chamber (`sector9_stasis_chamber`); **south** -> Coolant Lines (`sector9_stasis_coolant_lines`); **north** -> Observation Deck (`sector9_stasis_observation`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **ring console** (generic; object: ring console): The rings refuse to move until all four alignment frequencies are in phase.
- Action visibility/requirements: `{"requires_milestones": ["ms_w2_murals_read", "ms_w2_stasis_pod_read", "ms_w2_stasis_overview_read", "ms_w2_coolant_stabilized"], "requires_milestone_not_set": "ms_w2_stasis_awake"}`.
- Event `w2_mq03_align_complete` prerequisites: `[{"type": "quest_active", "quest_id": "w2_mq03"}, {"type": "milestone_set", "milestone": "ms_w2_murals_read"}, {"type": "milestone_set", "milestone": "ms_w2_stasis_pod_read"}, {"type": "milestone_set", "milestone": "ms_w2_stasis_overview_read"}, {"type": "milestone_set", "milestone": "ms_w2_coolant_stabilized"}, {"type": "quest_task_not_done", "quest_id": "w2_mq03", "task_id": "align_stasis_rings"}]`. See the numbered route for its quest/reward sequence.

Coolant Lines (`sector9_stasis_coolant_lines`)

A maintenance bay filled with stasis coolant lines. A coolant garden of luminous vines drinks from the thick pipes and keeps the ring pressure alive.

- **Exits: north** -> Ring Array (`sector9_stasis_ring_array`); **east** -> Source Dynamo (`sector9_power_turbine`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **coolant garden** (generic; object: coolant garden): Objective completed.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_coolant_stabilized"}`.
- Event `w2_mq03_stabilize_coolant` prerequisites: `[{"type": "quest_active", "quest_id": "w2_mq03"}, {"type": "milestone_not_set", "milestone": "ms_w2_coolant_stabilized"}]`. See the numbered route for its quest/reward sequence.

Observation Deck (`sector9_stasis_observation`)

A glass-shielded viewing balcony overlooking the stasis deck. The stasis mural overview displays vital signs and ring roles over the sleeping chamber.

- **Exits: south** -> Ring Array (`sector9_stasis_ring_array`); **north** -> Infiltration Hatch (`sector9_vents_access_grate`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **stasis mural overview** (generic; object: stasis mural overview): Three empty sockets surround the chamber mural, each showing how one ring protects memory from pressure.
- Event `w2_mq03_read_mural_overview` prerequisites: `[{"type": "quest_active", "quest_id": "w2_mq03"}, {"type": "milestone_not_set", "milestone": "ms_w2_stasis_overview_read"}]`. See the numbered route for its quest/reward sequence.

High Gantry (`sector9_vents_gantry`)

Walkway gantries suspended high above the stasis pod. A security grid sweeps across the dusty metal beams in tight, predictable pulses.

- **Exits: south** -> Access Shaft (`sector9_conduit_access_shaft`); **east** -> Infiltration Hatch (`sector9_vents_access_grate`).
- **South lock:** Razor-vines choke the shaft. The barbed stems will burst into toxic spores if cut cold. Requires `thermal_cutter`; consumed: False.
- **Direct encounters:** sentinel_orb.
- **security grid** (generic; object: security grid): Objective completed.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_grid_hacked"}`.
- Event `w2_sq05_hack_grid` prerequisites: `[{"type": "quest_active", "quest_id": "w2_sq05"}, {"type": "quest_task_not_done", "quest_id": "w2_sq05", "task_id": "hack_security_grid"}]`. See the numbered route for its quest/reward sequence.

Infiltration Hatch (`sector9_vents_access_grate`)

A ventilation access grate has been sliced open from the inside. Scrap metal shavings litter the guard-system bypass route.

- **Exits: west** -> High Gantry (`sector9_vents_gantry`); **north** -> Transmitter Site (`sector9_vents_tech_alcove`); **south** -> Observation Deck (`sector9_stasis_observation`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **guard-system bypass** (generic; object: guard-system bypass): Objective completed.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_guards_bypassed"}`.
- Event `w2_sq05_bypass_guards` prerequisites: `[{"type": "quest_active", "quest_id": "w2_sq05"}, {"type": "quest_task_not_done", "quest_id": "w2_sq05", "task_id": "bypass_guard_systems"}, {"type": "quest_task_done", "quest_id": "w2_sq05", "task_id": "hack_security_grid"}]`. See the numbered route for its quest/reward sequence.

Transmitter Site (`sector9_vents_tech_alcove`)

A narrow tech alcove behind the pipes. A locked case contains a stolen Dominion transceiver core.

- **Exits: south** -> Infiltration Hatch (`sector9_vents_access_grate`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **case** (generic; object: case): Objective completed.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_vent_case_looted"}`.
- Event `w2_sq05_find_transmitter` prerequisites: `[{"type": "quest_active", "quest_id": "w2_sq05"}, {"type": "quest_task_not_done", "quest_id": "w2_sq05", "task_id": "recover_transmitter"}, {"type": "quest_task_done", "quest_id": "w2_sq05", "task_id": "hack_security_grid"}, {"type": "quest_task_done", "quest_id": "w2_sq05", "task_id": "bypass_guard_systems"}]`. See the numbered route for its quest/reward sequence.

Source Gate (`source_gate`)

Entry: **Source Gate** (`sector9_source_gate`). Entry policy: transition; return policy: entry.

Source Dynamo (`sector9_power_turbine`)

A massive dynamo spins in a cylinder of glowing blue fluid, generating intense resonance. A turbine inscription runs along the dynamo housing.

- **Exits: west** -> Coolant Lines (`sector9_stasis_coolant_lines`); **east** -> Distribution Manifold (`sector9_power_manifold`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **turbine inscription** (generic; object: turbine inscription): Power was tuned like music here; every machine was expected to harmonize with the living swamp.
- **dynamo housing** (generic; object: dynamo housing): Massive induction coils rotate smoothly despite heavy mineral patina along the shaft.

Distribution Manifold (`sector9_power_manifold`)

Heavy manifolds route fluid to the gate emitters. A facility camp station glows under the pipes, shaking in time with the barrier hum.

- **Exits: west** -> Source Dynamo (`sector9_power_turbine`); **south** -> Generator Controls (`sector9_power_breaker_deck`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **Cook** (rest_stop; object: manifold cooker): A maintenance thermal plate offers sterile heat to press rations and simmer preserves. Cooking source: Thermal Cooker.
- **Rest** (rest_stop; object: facility camp station): Food and quiet rest bring party stamina back under control. Rest event: `w2_camp_power_manifold`.

Generator Controls (`sector9_power_breaker_deck`)

The generator breakers hang over the dynamo lines beside a bus bar array in a staggered emergency pattern. Each switch starves a different band of the gate's howl, but the living circuit needs somewhere safe to bleed first.

- **Exits: north** -> Distribution Manifold (`sector9_power_manifold`); **east** -> Purge Valve (`sector9_power_valve`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **generator breakers** (generic; object: generator breakers): Objective completed.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_breakers_overloaded"}`.
- Event `w2_mq05_overload_breakers` prerequisites: `[{"type": "quest_active", "quest_id": "w2_mq05"}, {"type": "milestone_not_set", "milestone": "ms_w2_source_breakers_starved"}]`. See the numbered route for its quest/reward sequence.
- **bus bar array** (generic; object: bus bar array): High-voltage conduit rails hum with power diverted from the primary sector core.

Purge Valve (`sector9_power_valve`)

An emergency valve used to purge overloaded static charges from the dynamo lines. A root pressure gauge trembles where living conduit enters the machinery.

- **Exits: west** -> Generator Controls (`sector9_power_breaker_deck`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **root pressure gauge** (generic; object: root pressure gauge): Objective completed.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_pressure_gauge_read"}`.

- Event `w2_mq05_read_pressure_gauge` prerequisites: `[{"type": "quest_active", "quest_id": "w2_mq05"}, {"type": "milestone_not_set", "milestone": "ms_w2_source_pressure_mapped"}]`. See the numbered route for its quest/reward sequence.

Source Gate (`sector9_source_gate`)

A giant barrier of humming energy blocks access to the hangar. The acoustic lock vibrates with three discordant, howling bands fed by a horn, a cup, pressure roots, and overloaded breakers.

- **Exits: north** -> Stasis Chamber (`sector9_stasis_chamber`); **west** -> Harmonic Horn (`sector9_gate_emitter_left`); **south** -> Resonance Cup (`sector9_gate_emitter_right`); **east** -> Hangar Bay (`sector9_hangar_bay`).
- **East lock:** The Source Gate barrier blocks the hangar. Prepare its four feeds, then resolve the acoustic lock. Required room state: [{"room_id": "sector9_source_gate", "state_key": "barrier_resolved", "value": true}].
- **NPC:** Orion (`orion`); requires milestones ms_w2_mq03_complete; absent after ms_w2_mq05_complete. While visible, quest dialogue eligibility still applies.
- **Direct encounters:** none; action-spawned encounters are separate.
- **acoustic lock** (generic; object: acoustic lock): Prepare all four feeds first: brace the horn, ground the cup, read root pressure, and isolate the breakers.
- Action visibility/requirements: `{"requires_milestones": ["ms_w2_source_horn_stabilized", "ms_w2_source_cup_grounded", "ms_w2_source_pressure_mapped", "ms_w2_source_breakers_starved"], "requires_milestone_not_set": "ms_w2_gate_bypassed"}`.
- Event `w2_mq05_bypass_gate` prerequisites: `[{"type": "quest_active", "quest_id": "w2_mq05"}, {"type": "milestone_set", "milestone": "ms_w2_source_horn_stabilized"}, {"type": "milestone_set", "milestone": "ms_w2_source_cup_grounded"}, {"type": "milestone_set", "milestone": "ms_w2_source_pressure_mapped"}, {"type": "milestone_set", "milestone": "ms_w2_source_breakers_starved"}, {"type": "quest_task_not_done", "quest_id": "w2_mq05", "task_id": "bypass_source_gate"}]`. See the numbered route for its quest/reward sequence.

Harmonic Horn (`sector9_gate_emitter_left`)

The left emitter tower focuses the lock frequency. The copper horn vibrates violently, and an emitter memory glows inside its service frame.

- **Exits: east** -> Source Gate (`sector9_source_gate`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **emitter memory** (generic; object: emitter memory): Objective completed.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_horn_stabilized"}`.
- Event `w2_mq05_stabilize_horn` prerequisites: `[{"type": "quest_active", "quest_id": "w2_mq05"}, {"type": "milestone_not_set", "milestone": "ms_w2_source_horn_stabilized"}]`. See the numbered route for its quest/reward sequence.

Resonance Cup (`sector9_gate_emitter_right`)

The right receiver cup grounds the barrier. The stone container glows white-hot beside an emitter service log etched into the rim.

- **Exits: north** -> Source Gate (`sector9_source_gate`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **emitter service log** (generic; object: emitter service log): Objective completed.

- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_cup_grounded"}`.
- Event `w2_mq05_ground_cup` prerequisites: `[{"type": "quest_active", "quest_id": "w2_mq05"}, {"type": "milestone_not_set", "milestone": "ms_w2_source_cup_grounded"}]`. See the numbered route for its quest/reward sequence.

Hangar Bay (`hangar_bay`)

Entry: **Hangar Bay** (`sector9_hangar_bay`). Entry policy: transition; return policy: entry.

Hangar Bay (`sector9_hangar_bay`)

A vast underground cavern opens to the sky. The Astra sits silent on the launch pad, her dark console starved of power. A bridge relic waits on the central dais while the launch cradle holds the ship like a breath not yet released.

- **Exits: west** -> Source Gate (`sector9_source_gate`); **north** -> Maintenance Catwalks (`sector9_hangar_scaffolding`); **south** -> Freight Lift (`sector9_hangar_staging`).
- **NPC:** Zeke (`zeke`); requires milestones ms_w2_mq03_complete; absent after ms_w2_mq05_complete. While visible, quest dialogue eligibility still applies.
- **Direct encounters:** none; action-spawned encounters are separate.
- **dark console** (generic; object: dark console): Objective completed.
- Action visibility/requirements: `{"requires_milestone_not_set": "ms_w2_astra_inspected"}`.
- Event `w2_mq05_inspect_astra` prerequisites: `[{"type": "quest_active", "quest_id": "w2_mq05"}, {"type": "quest_task_done", "quest_id": "w2_mq05", "task_id": "bypass_source_gate"}, {"type": "quest_task_not_done", "quest_id": "w2_mq05", "task_id": "inspect_astra"}]`. See the numbered route for its quest/reward sequence.
- **bridge relic** (generic; object: bridge relic): The Astra needs her power conduits restored first. Once the Bridge has ship current, the Chime can authenticate Orion at the console.
- Event `w2_mq05_reboot` prerequisites: `[{"type": "quest_active", "quest_id": "w2_mq05"}, {"type": "quest_task_done", "quest_id": "w2_mq05", "task_id": "collect_power_conduits"}, {"type": "quest_task_not_done", "quest_id": "w2_mq05", "task_id": "reboot_bridge_relic"}, {"type": "item", "item_id": "bridge_relic", "quantity": 1}, {"type": "item", "item_id": "ghost_signal_cell", "quantity": 1}]`. See the numbered route for its quest/reward sequence.
- **launch cradle** (generic; object: launch cradle): The launch cradle will not release the Astra until the bridge relic is awake.
- Event `w2_mq05_launch` prerequisites: `[{"type": "quest_active", "quest_id": "w2_mq05"}, {"type": "quest_task_done", "quest_id": "w2_mq05", "task_id": "reboot_bridge_relic"}, {"type": "quest_task_not_done", "quest_id": "w2_mq05", "task_id": "launch_ship"}]`. See the numbered route for its quest/reward sequence.
- **salvage return route** (generic; object: salvage return route): The service hatch follows the conduit route back toward the crashed pod.
- Action visibility/requirements: `{"show_when_milestone": "ms_w2_astra_inspected", "requires_milestone_not_set": "ms_w2_conduits_collected"}`.
- Event `w2_mq05_return_to_pod` prerequisites: `[{"type": "quest_active", "quest_id": "w2_mq05"}, {"type": "quest_task_done", "quest_id": "w2_mq05", "task_id": "inspect_astra"}, {"type": "quest_task_not_done", "quest_id": "w2_mq05", "task_id": "collect_power_conduits"}]`. See the numbered route for its quest/reward sequence.

Maintenance Catwalks (`sector9_hangar_scaffolding`)

Catwalks suspended around the Astra's charred hull lead to a hangar overlook. Cables run from the scaffold into the ship.

- **Exits: south** -> Hangar Bay (`sector9_hangar_bay`); **east** -> Control Console (`sector9_hangar_tower`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **hangar overlook** (generic; object: hangar overlook): Vines lace the roof while immaculate Aethel rails descend below, a final union of wild growth and design.

Freight Lift (`sector9_hangar_staging`)

A freight lift used to load fuel cells onto the launch pad sits beside heavy cargo restraints. The control motor is offline.

- **Exits: north** -> Hangar Bay (`sector9_hangar_bay`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **cargo restraints** (inspect; object: cargo restraints): Zeke has secured loose cargo. Departure takes the whole crew out of Sector 9; unfinished local errands will have to wait.

Control Console (`sector9_hangar_tower`)

The launch computer towers rise beside a glowing airlane chart. Conduits from the stasis core are routed here to boot systems.

- **Exits: west** -> Maintenance Catwalks (`sector9_hangar_scaffolding`); **south** -> Fuel Intake Lines (`sector9_hangar_fuel_lines`); **north** -> Launch Blast Shield (`sector9_hangar_lock`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **airlane chart** (inspect; object: airlane chart): Orion's chart follows a low service airlane to the Spire. The outer Planetary Shield stays overhead; this flight cannot cross it.

Fuel Intake Lines (`sector9_hangar_fuel_lines`)

Fuel intake lines run alongside the main conduit bus. Fused fuel manifolds require manual routing to deliver starter fluid.

- **Exits: north** -> Control Console (`sector9_hangar_tower`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **conduit bus** (inspect; object: conduit bus): The replacement power conduits match the crashed pod's gauge. Ship current powers the Bridge; the Chime supplies identity authentication.

Launch Blast Shield (`sector9_hangar_lock`)

The ceiling blast shields covering the hangar are controlled by a launch safety panel. Massive gear teeth lock the shields in place.

- **Exits: south** -> Control Console (`sector9_hangar_tower`); **north** -> The Sky (`sector9_the_sky`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **launch safety panel** (inspect; object: launch safety panel): The cradle releases from Hangar Bay after the Bridge is installed. Check supplies and local quests before confirming departure.

The Sky (`the_sky`)

Entry: **The Sky** (`sector9_the_sky`). Entry policy: transition; return policy: entry.

The Sky (`sector9_the_sky`)

A holographic flight-plan projection fills an observation alcove above the hangar. The Astra remains in her cradle below. The airlane preview shows a low service corridor toward the Spire, with the outer Planetary Shield far overhead.

- **Exits: south** -> Launch Blast Shield (`sector9_hangar_lock`); **north** -> Mesosphere Storm (`sector9_sky_mesosphere`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **airlane preview** (inspect; object: airlane preview): This is a route preview, not a flight. Release the launch cradle in Hangar Bay when the crew is ready.

Mesosphere Storm (`sector9_sky_mesosphere`)

A storm overlay paints static across the projected cockpit glass. The route stays beneath the hard deck; the preview marks weather pockets along the low airlane.

- **Exits: south** -> The Sky (`sector9_the_sky`); **north** -> Shield Threshold (`sector9_sky_shield_threshold`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **storm overlay** (inspect; object: storm overlay): The route skirts the storm front instead of climbing toward the shield. Orion needs a stable counter-tone if guidance becomes noisy.

Shield Threshold (`sector9_sky_shield_threshold`)

The shield ceiling overlay places the violet Shield lattice far above the service airlane. A red altitude line marks the ceiling the Astra must stay beneath.

- **Exits: south** -> Mesosphere Storm (`sector9_sky_mesosphere`); **east** -> Security Buoy (`sector9_sky_sensor_buoy`); **north** -> Barrier Controller (`sector9_sky_barrier_core`); **west** -> Pushback Node (`sector9_sky_hard_deck`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **shield ceiling overlay** (inspect; object: shield ceiling overlay): The Planetary Shield is overhead. Reaching the Spire does not cross it; the crew still needs another way beyond its limits.

Security Buoy (`sector9_sky_sensor_buoy`)

The security scan preview shows a Dominion sensor buoy sweeping the approach to the Spire. Its scan bands cut across the projected airlane.

- **Exits: west** -> Shield Threshold (`sector9_sky_shield_threshold`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **security scan preview** (inspect; object: security scan preview): The buoy can interfere with local guidance. Gh0st marks an approach beneath the strongest scan bands.

Barrier Controller (`sector9_sky_barrier_core`)

A guidance interference model separates the local Dominion guidance channels from the distant planetary barrier. A pulse of interference turns the Spire approach red.

- **Exits: south** -> Shield Threshold (`sector9_sky_shield_threshold`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **guidance interference model** (inspect; object: guidance interference model): Local guidance can fail even below the shield. The manual ground path must remain available; forcing the Bridge harder will not fix the airlane.

Pushback Node (`sector9_sky_hard_deck`)

A safety diagram linked to the altitude limiter shows the permitted service altitude beneath the outer Shield. The projected Astra never crosses the red hard-deck line.

- **Exits: east** -> Shield Threshold (`sector9_sky_shield_threshold`).
- **Direct encounters:** none; action-spawned encounters are separate.
- **altitude limiter** (inspect; object: altitude limiter): Keep below the hard deck. The low airlane ends at the Spire, not beyond the planetary barrier.

16. Journal checklist: all ten quests

Current authored task text. Complete required turn-ins and verify actual rewards; journal completion alone does not establish payout.

A Strange Coast (`w2_mq01`)

Check on Zeke, recover the Chime and emergency supplies from the pod, stabilize him, then follow the glow-water stream toward shelter.

Assess the Crash

- [ ] Talk to Zeke at the pod wreckage. (`check_on_zeke`)
- [ ] Examine the wrecked navigation console. (`examine_pod`)
- [ ] Use the emergency medkit to stabilize Zeke. (`stabilize_zeke`)
- [ ] Follow the glow-water stream into the ruins. (`follow_stream`)

The Signal (`w2_mq02`)

Push through the hostile canopy, find the Temple Gate, and use the recovered Chime to open the route into Sanctuary.

The Sanctuary Threshold

- [ ] Clear the hostile paths through the canopy. (`clear_canopy_path`)
- [ ] Locate the massive Temple Gate. (`locate_temple_gate`)
- [ ] Slot the Chime into the Temple Gate's resonator. (`insert_chime`)

Sleeping Giant (`w2_mq03`)

Power Sanctuary from reserve cells, wake Orion after Chime authentication, and recover the separate Bridge Echo.

Ancient Geometry

- [ ] In the Hall of Echoes, examine the shifting light murals above the empty crystal shadows. (`inspect_murals`)
- [ ] From the Hall of Echoes, head south to Orion's Stasis Chamber. (`find_stasis_chamber`)

Awaken the Tuner

- [ ] Read the chamber clues, then route pressure, memory and return at the Ring Array. (`align_stasis_rings`)
- [ ] Return to Stasis Chamber and talk to the awakened Orion. (`talk_to_orion`)
- [ ] After talking to Orion, open the sealed Bridge cradle in Stasis Chamber. (`recover_bridge_relic`)

The Hunter (`w2_mq04`)

Confront Gh0st, survive the Beast, then finish Orion's grounded Anchor Drill before Link unlocks.

Confrontation

- [ ] Travel to the wind-swept Canopy Ridge. (`reach_canopy_ridge`)
- [ ] Confront the hunter waiting in the shadows. (`confront_stalker`)

- [ ] Put down the mutated Source Beast. (`defeat_the_beast`)
- [ ] Complete Orion's cutter-Bridge grounding drill. (`complete_anchor_drill`)

Liftoff (`w2_mq05`)

Settle the Source Gate, salvage conduits, install the Bridge, authenticate Orion with the Chime, and fly low to the Spire.

Rebuild the Circuit

- [ ] Resolve the Source Gate's horn, cup, roots, and breakers. (`bypass_source_gate`)
- [ ] Inspect the Astra's dark console. (`inspect_astra`)
- [ ] Return to the Pod Fragment and recover the salvage conduits from the wreckage. (`collect_power_conduits`)
- [ ] At the Hangar Bay, use the recovered conduits to install the Bridge and authenticate Orion with the Chime. (`reboot_bridge_relic`)
- [ ] Release the Astra from the launch cradle. (`launch_ship`)

Botanist (`w2_sq01`)

Find and scan unique flora in Sector 9.

Ecological Scan

- [ ] In Resonant Canopy, scan the giant crystalline ferns. (`scan_flora_1`)
- [ ] At Tide Pools, scan the bioluminescent weeds. (`scan_flora_2`)
- [ ] At Crash Site, scan the moss clinging to the pod wreckage. (`scan_flora_3`)
- [ ] In Resonant Canopy, scan the razor-vine spores. (`scan_flora_4`)
- [ ] In Stasis Chamber, scan the ancient root lattice. (`scan_flora_5`)
- [ ] Return to Zeke with the five plant scans. (`report_to_zeke`)

Lost Patrol (`w2_sq02`)

Locate the logs of a lost squad in the Sector 9 ruins and turn their damaged cutter into a useful field tool.

Broken Signals

- [ ] In Spore Thickets, trace distress signature alpha. (`trace_alpha`)
- [ ] In Poison Hollow, decode distress signature beta. (`trace_beta`)
- [ ] At Sniper Lookout, confirm distress signature gamma. (`trace_gamma`)

Dominion Downfall

- [ ] Recover the patrol transceiver in Burned Glade, along with the damaged Thermal Cutter. (`recover_transceiver`)
- [ ] Repair the Thermal Cutter at a tinkering station. (`repair_thermal_cutter`)

Tideglass Day (`w2_sq03`)

Visit Tide Pools, gather clean herbs and meat, then craft Source Resin at a tinkering station.

A Breather by the Waves

- [ ] Visit Tide Pools on Tideglass Beach. (`visit_beach`)
- [ ] Scavenge tideglass herbs and clean meat. (`collect_food`)
- [ ] Craft Source Resin from the gathered materials. (`craft_source_resin`)

Ancient Echoes (`w2_sq04`)

Calibrate the light-murals to hear their full song.

Scattered Chorus

- [ ] Retrieve the western wing resonance crystal. (`crystal_west`)
- [ ] Retrieve the eastern wing resonance crystal. (`crystal_east`)
- [ ] Retrieve the acoustics lab resonance crystal. (`crystal_north`)

Chorus Tuning

- [ ] Seat the crystal voices and restore the mural chord. (`mural_tuning`)

Stolen Tech (`w2_sq05`)

Scavenge the maintenance vents for the transmitter.

Silent Frequency

- [ ] At High Gantry, blind the vent security grid's timing. (`hack_security_grid`)
- [ ] At Infiltration Hatch, slip past the guard-system scan pattern. (`bypass_guard_systems`)

Ventilation Scramble

- [ ] Search the ceiling vent from Stasis Chamber, then recover the transmitter core at Transmitter Site. (`recover_transmitter`)
- [ ] Assemble the Rapid Capacitor from the transmitter core. (`assemble_capacitor`)

17. If you are stuck

Match your journal to the symptom. Check prerequisites before resetting. Preserve a problematic save for reporting.

Stream did not complete A Strange Coast

Finish crash Zeke dialogue, navigation console at Crash Site, and emergency medkit in Pod Interior. Return south, then east into Stream Bank. All three must be done on entry.

Botanist unavailable or scans did nothing

Main-quest hints take priority. On this route, finish Sleeping Giant, return to the still-visible Zeke at Stasis, accept Botanist, then revisit all five sites: moss at Crash Site, weeds at Tide Pools, ferns AND spores at Resonant Canopy, roots at Stasis. Report to Zeke after all five for 100 XP, two stabilizers and the completion AP. Older already-completed but unpaid saves do not receive automatic restitution; preserve that save for review.

Patrol cache will not recover

Alpha: canopy remains or Spore Thickets. Beta: Poison Hollow. Gamma: Sniper Lookout. Then Burned Glade patrol transceiver. Patrol Graveyard transceiver aliases beta, not the final cache.

Cutter shortcut still blocked

Learn Thermal Cutter blueprint, craft damaged cutter + wire + scrap, keep the repaired tool. The gate checks thermal_cutter, not a blueprint or damaged handle.

Temple stone lock does nothing

The Signal must be active; Clear canopy path and Locate Temple Gate checked. Clear the authored vine/borer encounter if needed and use Temple Gate stone lock, not the shop.

Ring console refuses input

Inspect Hall murals, Stasis pod, Observation overview and Coolant garden while MQ03 active. Return to Ring Array. Optional chorus crystals do not replace these clues.

Orion awake but missing from party

Go west from Ring Array to Stasis Chamber and finish the full awakening dialogue. Recruitment is on its final trigger.

Sleeping Giant still active after recruitment

Open sealed Bridge cradle in Stasis Chamber. Talk and recovery are separate tasks. His optional quests require this completion.

Tideglass Day beach task missing

Accept after MQ03, then re-enter sector9_beach_pools. Mist Pools is a node entry, not the credited beach room. Leave and re-enter if already there.

Source Resin craft not credited

Gather tideglass after Visit beach, learn its blueprint and craft Herb + Beast Meat in Tinkering. Meals, old resin and grotto cache do not fulfill this task.

Crystals inspected earlier but uncredited

Accept Ancient Echoes after MQ03, revisit Temple Left west, Temple Right east and Acoustics Lab north. Central relief: west foundation, east arcs, north star.

Confront stalker or Beast absent

Finish Sleeping Giant including Bridge recovery. Return Canopy Ridge, Confront stalker then Face the Beast. Early scouting has no automatic boss fight.

Beast won but Link absent

Use Anchor Drill and finish cinematic. Beast recruits Gh0st; drill unlocks Link/completes Hunter/starts Liftoff. Preserve pending-scene saves if recovery fails.

Transmitter or Stolen Tech blocked

After finishing the drill, tap the visible Gh0st at Canopy Ridge and accept Stolen Tech. High Gantry grid: maintenance gap. Hatch: guard bypass. Transmitter Site case. Learn/craft capacitor from core, wire and scrap; premade toolbox loot is insufficient.

Source Gate closed

While Liftoff active prepare horn emitter memory, cup service log, Generator Controls breakers and Purge Valve pressure gauge. Acoustic lock: grounded receiver relief, then isolated lock supply with relief open.

Salvage route/conduits unavailable

After bypass inspect Hangar dark console, use salvage return route, collect conduits at Pod Fragment, then return to Astra. Early crash exploration does not collect late salvage.

Bridge reboot or launch does nothing

Conduits must be collected; retain bridge_relic and ghost_signal_cell before installation. Hangar bridge relic, then launch cradle. Preview rooms never launch. Preserve inconsistent older saves instead of editing state.

World 3 transition pending

Confirm Release the cradle and depart and finish cinematic. Finish exploring cancels. On reload check pending scene, destination and one reward; dialogue appearance alone is not departure completion.

18. Playtest checkpoints and reporting

Use the guide to observe the actual game, not to assume presentation and combat already pass. Keep flow, balance and writing notes distinct.

- Opening: does Zeke sound injured/procedural, does emergency medkit location make sense, and is the fishing kit natural? Record abrupt lines and missing guidance.
- Exploration: document failed directional taps, confusing node reveals/returns, unclear optional branches, and containers that repeat after load.
- Prism: solve visually before reading targets. Evaluate beam aim, fringe, green brightness, slider touch control and diagnostic usefulness.
- Stasis: try one wrong answer, step away and reopen. Confirm no recruitment before final conversation and no completion XP before Bridge recovery. Judge awakening pacing.
- Crafting: learn each blueprint, check preview/result names, supplied ingredients, successful craft credit and no material loss from invalid attempts.
- Beast: record campaign gear/levels, duration, healing use, deaths, understood telegraphs and retreat/retry. OP/instant wins only assess flow.
- Drill: judge whether grounding/Bridge/Link explanation is clear; check skill, journal and party after the full scene finishes.
- Vents/gate: wrong answers should teach/retry, closing is safe, vent mask is latched without countdown, and gate needs actual routing decisions.
- Save/load: check after stream, prism, stasis wake, recruitment/Bridge, drill, crafts and ship repair. Use known saves rather than assuming force-quit is a save.
- Departure: cancel once, complete a local action, return and depart. Verify low flight beneath Shield, Spire arrival, party/inventory and exactly one completion payout.
- Report version, room ID, exact action, expected/observed result, active quest/tasks, campaign vs scenario origin and screenshot. Keep the affected save.

19. Review sources and limits

Source-reviewed October 29 against the readiness fixes. Corrected actual NPC availability, deferred Botanist route and required reward turn-in, late Orion offers, physical gates, local favors/exits, and PDF version metadata. Room and journal references are regenerated from current catalogs. This guide update changes documentation and its generator; the separately authorized gameplay fixes are published alongside it.

- Primary sources: `rooms.json`, `hub_nodes.json`, `quests.json`, `events.json`, `dialogue.json`, `tuning_puzzles.json`, `recipes_tinkering.json` and `items.json` in `app/src/main/assets`.
- Cross-checks: current crew progression and skill tuning, `docs/WORLD2_REFINEMENT_PASS.md`, and menu schematic controls. The October 29 readiness batch passed 110 focused JVM tests, including earned World 2 main/completionist routes, actual Botanist payout and save parity. It uses seed 17, supplied puzzle answers and accelerated presentation, and is not a complete phone playthrough.
- Routes derive from current room connections; cutter shortcuts are excluded before repair and sluice south explicitly requires drained state. Device navigation, touch targets, scenes and difficulty need playtesting.
- No fixed arrival levels, total XP, credit budgets, guaranteed random drops or unsupported permanent quest-failure claims. Direct event XP differs from battle XP.
- Covers all 93 node rooms and ten quests. Every random fish, arcade restoration and cooking experiment are separate system collection goals, not hidden chapter prerequisites.
