PRO-TIP: World 4 Heavy Armor & Slag Mechanics

- 1. **The Anvil Relic Power:** Unlocks +35% physical guard-break efficiency for Zeke and Nova.
- 2. **Thermal Resistance Alert:** Foundry enemies are 100% immune to Burn. Do NOT use Gh0st Meltdown Blade; swap him to High-Frequency Slice for raw physical crits.
- 3. **Coolant Gel Stacking:** Equip Coolant Gel in party Snack slots to negate lingering Molten Burn status.
